

## Preparation Prior to Treatment

These steps need to be carried out before each and every visit.

### **Cockroaches**

- Empty out kitchen cupboards
- Pull all furniture away from walls so that the joints between the floors and walls can be sprayed
- Arrange all furniture/objects in the centre of the room
- Wipe down the skirting boards and Hoover up thoroughly where furniture has been moved
- Remove the plinth from the bottom of the kitchen cupboards and clean the area underneath.
- Pull out the refrigerator and clean up thoroughly around it
- Pull out the cooker and clean up thoroughly around it
- Pull out the washing machine and clean up thoroughly around it
- Remove the bath panel so that the area underneath the bath can be sprayed
- Pick up all objects from the floor and Hoover carpets thoroughly
- Ensure that all areas where cockroaches have been seen are clear and ready to be sprayed
- The aim is to create clear surfaces which can be sprayed with insecticide
- There should be nothing at all against any skirting board.
