Key														
Hits	Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.													
Page Views	A hit to any file classified as a page. Contrast the value for "page views" with the value for "hits," which includes hits to files of every type.													
Visitor Sessions	A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. An individual can visit a website a number of times during the report period. Each visit is counted as a new session.													
Visitors	Individuals who visited our site during the report period. If someone visits more than once, they are counted only the first time they visit.
