
6. Monitoring and Implementation

6.1 This section outlines how the London Borough of Haringey will translate its vision for the future of the borough into action. National guidance makes clear core strategies should be based on sound infrastructure planning delivery. The Council in partnership with the public, private and voluntary sector agencies will deliver the core strategy through the following mechanisms:

- Community Involvement
- Working in partnership
- Use of Council powers and resources
- Monitoring and Review

Community Involvement

6.2 Involving local communities in developing our policies and services is essential to achieving the vision set out in the Sustainable Community Strategy - *'A place for diverse communities that people are proud to belong to'*.

6.3 Planning affects everyone - where you live, work, and how you spend your leisure time. Therefore, involving the community through engagement and consultation is an integral part of planning. As part of the LDF, we have developed a Statement of Community Involvement (SCI) which provides a clear framework for the community to know when, how and for what reason community involvement will happen.

6.4 The SCI sets out our principles for community involvement. This includes strong commitment to overcoming social inclusion and reaching out to our diverse communities. Further information on our approach to community involvement is available from www.haringey.gov.uk/statement_of_community_involvement_2008.pdf

Working in Partnership

6.5 In order to achieve its priorities and vision, the core planning strategy will be the vehicle for enabling development and facilitating the implementation of the council and its partner's strategies, both at regional and borough levels.

6.6 Some of the most serious issues and opportunities facing London are best addressed at the sub-regional level. Haringey is part of the north London sub-region and as part of the North London Strategic Alliance (NLSA) has prepared an action plan which identifies four key objectives for improving and promoting the sub-region. These are:

- Promoting economic growth and creating jobs;
- Developing education and skills;
- Making North London a better place to live, work and visit; and
- Improving north London's infrastructure.

6.7 A co-ordinated approach at the sub-regional level will also be needed for the Lee Valley Corridor in order to maximise regeneration and development opportunities but also to exploit the potential legacy of the Olympics 2012 Games to benefit North London.

6.8 Other key areas of sub-regional working include housing. Haringey, in partnership with the London Boroughs of Westminster, Barnet, Enfield, Camden and Islington, are currently working on a sub-regional housing strategy.

6.9 Haringey also forms part of the London-Stansted-Cambridge- Peterborough Growth Corridor and as such is working with the London Boroughs of Enfield, Waltham Forest, Redbridge and Hackney to ensure opportunities arising from the growth agenda bring the greatest benefits to the area's communities.

6.10 The Haringey Strategic Partnership (HSP) has produced the boroughs Sustainable Community Strategy with the aim of making the borough a better place for working together to improve local services. The key priorities of the community strategy inform the Core Strategy spatial objectives.

Use of Council Powers and Resources

6.11 The Council has many buildings that are under its control and/ or which it owns outright. This includes sports centres, libraries, community centres, schools, parks and many more. Many of these facilities are statutory and therefore are paid for by council budgets or subsidised by the council to ensure local residents have access to facilities that meet everyday needs. However, there is a cost implication and as the Council does not have infinite resources, it needs to look to other sources of funding.

Monitoring and Review

6.12 We will monitor the implementation and effectiveness of the policies within the Core Strategy through an Annual Monitoring Report which is submitted to GOL. We have also developed a Monitoring Framework setting out the relationships with the SCS and the London Plan as well as identifying the key outcomes expected by 2026. This framework is available at www.haringey.gov.uk/corestrategy.
