

# Street Gritting

## Priority 1 Carriageways

The following roads are Priority 1 carriageways for street gritting, which are the top priority in the event of snowfall. These are heavily used roads, main roads, roads that have bus routes and roads where risk from snow fall is higher due to steeper gradients of roads.

In the event of snowfall settling the Council will dispatch gritting vehicles to spread rock salt on these roads first. Although gritting is usually commenced once snow has started to settle, the Council occasionally grits before snow falls if conditions and weather forecasts suggest this is a wise course of action.

Gritting too far in advance of snow fall can be a waste of time as the grit may be thrown to the side of the road by traffic and by the time snow falls there may be none left on the carriageway to be of any use. It is not unusual to grit Priority 1 roads more than once during a sustained cold period when snow continues to fall.
