

Appendix A: Text comments from interactive map

The comments from the interactive map are shown in the table below. Where suggestions were plotted without an additional written comment, they have not been included in the table below.

Suggestion	Comments	x	y
Alternative road closure point	Why? Makes no sense doing it this way... It's just creating a bottleneck and shoving the problem to other roads ... Would it not be easier to make Middle Lane and Park Road both one way traffic? Same could be done for Farrer and Park Avenue South as well	51.588753	-0.133908478
Alternative road closure point	Currently working from home and the traffic speeds and noise on the road are much increased. Enforce the 20mph limit, plant trees, install electric car chargers and get rid of the on pavement parking.	51.58025018	-0.1241495
Alternative road closure point	Ferre Park Road suffering from excessive through traffic, virtually all speeding. This is a residential road. Some sort of road closure at Tottenham Lane end required. - except for buses and residents required.	51.58027077	-0.1262285
Alternative road closure point	Close Park Avenue South as it is rat run by cars going south and west, greatly increased in trial.	51.58542805	-0.115452603

	Close it at Park Road end with no exit and no entry signs enforced by camera (except fire engines)		
Alternative road closure point	close the top (North end) half of middle lane only - buses are not affected, it increases pedestrian flow to food and beverage businesses at the top of middle lane	51.58147437	-0.129228429
Alternative road closure point	It's been horrendous getting around. When I have not been stuck in traffic (a 5 minute journey once took 40 minutes!) I have had to breath increased fumes from the traffic. Middle lane closing has created the biggest mess.	51.58091891	-0.13075
Alternative road closure point	This site is not working correctly I have tried to post comments numerous times. Please turn Farrer Road into a cul du sac to mitigate against any form of implementation of this scheme.	51.58631023	-0.114594296
It doesn't work here	It is not helpful having Hillfield Avenue closed - the traffic have moved onto the other side roads.	51.58764789	-0.123227461
It doesn't work here	Cars from Ferme park cutting up Nelson Road. We can't get out the top of the Road because Tottenham Lane is	51.57984	-0.13225396

	gridlocked and our st in one way		
It doesn't work here	Are you measuring the air quality in the centre of Crouch End and on Crouch End Hill during the trial? If today is anything to go by, the volume of traffic crawling past Coleridge Primary School and into Crouch End is going to adversely affect ai quality	51.57581	-0.116814881
It doesn't work here	In rush hour, traffic is queuing from Tottenham Lane right back to Weston Park	51.58146008	-0.123051062
It doesn't work here	Absolute gridlock on W7 bus route in both directions morning and eve. Even still at 7.30pm. Your website says no bus routes would be affected. This is not the case. Usual 20 mins from Finsbury Park to Muswell Hill now 40 mins. Please stop this trial now.	51.58773144	-0.124422609
It doesn't work here	Traffic is gridlocked, exhaust fumes from stationary traffic unpleasant, journey from finsbury park to alexandra palace by bus took over 1hr and a half. Trial not working, please scrap.	51.586179	-0.11723359
It doesn't work here	A real disaster. Gridlocked traffic, impossible to exit	51.581958	-0.123735265

	my home. Taking unwell wife to doctors appointment took 20 minutes just to get from end of road to beyond park road.		
It doesn't work here	The chaos felt tonight in Crouch End, Muswell Hill, Highgate, Turnpike Lane, Hornsey and Harringey was unimaginable. The knock on effect of closing Middle Lane is that Tottenham Lane, Park Road and Priory Road are in gridlock.	51.5852014	-0.115846897
It doesn't work here	AT 5.30PM it took me 50 minutes to get from the traffic lights at the Victoria Stakes to my house Gridlocked traffic. No way to avoid the chaos in either direction to get to my house!	51.58332144	-0.130382
It doesn't work here	I am a GP and need to be able to get in and out of the area. This is endangering the lives of my patients with its total gridlock. What about Ambulances, Fire (bottom of Park Avenue South - now a rat run) and police? My suggestion is that you rethink.	51.58718	-0.122104482
It doesn't work here	A pre announced disaster. over an hour to get from hornsey road down to	51.5875479	-0.123978479

	crouch end broadway until I finally reached my destination at New River Village. Seriously, whoever came up with this idea should think life all over again.		
It doesn't work here	Took 40mins to get from Finsbury Park to Crouch End Broadway (normally 5-10mins. Caused complete chaos felt everywhere around Crouch End, Hornesey, Finsbury Park, & up to Muswell Hill. Missed a doc appnt as was stuck in a complete gridlock, total disaster	51.58419348	-0.123606519
It doesn't work here	We live on (a small residential street) and both morning and evening it has been completely gridlocked. So much so that I was unable to get out of my parking space for 10 minutes then it took another 30 minutes to get to Tottenham Lane where	51.58649465	-0.1221695
It doesn't work here	This trial is a complete disaster and a total madness! You must stop it immediately. It took me 1 hr to drive from the top of the Broadway to Home! I cannot understand how this helps to anyone really? none of the roads	51.583696	-0.123209

	should be closed in that area ever!		
It doesn't work here	Closing middle lane to traffic has made it unsafe to walk along in the evening, particularly given it's proximity to Priory Park. There is no alternative safe walking route short of using Park Road and adding a mile to my walk home. I will need to uber..	51.58462587	-0.1169
It doesn't work here	It's a disgrace! Do measure the air quality changes coming from gridlocked roads be it the parade, park road, priory road etc etc. Stop it NOW	51.57788597	-0.129479815
It doesn't work here	Total disaster running at same time as having temp traffic lights on Tottenham Lane, please stop until traffic lights removed! Cycling almost impossible all the way to Hornsey Rd, lots more pollution on walk to/from nursery.Lots of traffic on Nelson Rd.	51.58184809	-0.121321276
It doesn't work here	A very bad idea.	51.58004578	-0.1304495
It doesn't work here	Impossible to get on 41 and be at work on time despite leaving 45 mins early. Total chaos. Bravo to whoever signed it off.	51.58439265	-0.126728
It doesn't work here	It has made the traffic much worse on Park Road which affects commuting	51.58473	-0.123609989

	time and air pollution. It's pushing more traffic down an already busy road.		
It doesn't work here	Gridlocked the area and increased rat running. Remove parking bays to protect cyclists and buses. Bus commuters, walkers, cyclists suffering more than drivers actually.	51.58584136	-0.123480753
It doesn't work here	Huge delays, idle traffic causing fumes. Very disappointed	51.58021606	-0.1235285
It doesn't work here	The whole of Crouch End was in meltdown yesterday. Thousands of journeys disrupted causing congestion and pollution for the community that you are hoping to help? ..you need to pause this and engage with ALL RESIDENTS AND BUSINESSES!!	51.57965464	-0.123896197
It doesn't work here	PLEASE STOP THIS TRIAL! IT IS CAUSING CHAOS!!!	51.580986	-0.123790907
It doesn't work here	The whole of Crouch End was Gridlocked, polluted and angry about your scheme....the very people that you claim to be doing this for. You need to pause, re think and this time engage with ALL RESIDENTS AND BUSINESSES that will be affected!!	51.579681	-0.12310875

It doesn't work here	First two days have seen increased traffic on Ferme Park Road, leading to congestion with the inevitable impact on air quality (I hope monitoring is being undertaken) and pedestrians. Many side roads have been blocked and chaotic.	51.57969	-0.131724
It doesn't work here	the W7 buses are gridlocked, traffic fumes are appalling and journey times for those of us who live round her are now dreadful.	51.58346541	-0.123399396
It doesn't work here	Its cause more problems blocking middle lane off. I would suggest making the elmfield avenue and rokesly avenue be one way road	51.58276144	-0.113049344
It doesn't work here	I live off Priory Road, where there was ZERO consultation with or information provided to the local residents. Which is utterly negligible given the closure of Middle Lane would have a direct impact on the traffic to Priory Road.	51.588222	-0.132609019
It doesn't work here	Seriously, whoever came up with this should receive their P45. What an utter waste of time and money. I'm taking a note of who the councilors are and I'll	51.580113	-0.126256541

	be sure to vote for anyone else at the next local elections.		
It doesn't work here	Did the council carry out an equalities impact for women? Closing roads to cars makes them creepy and unsafe to walk along at night.	51.58149003	-0.122784404
It doesn't work here	Is this the start of The Crouch End Gated Community? Will you need a Waitrose card to access Middle Lane? Or maybe the council will just seal off less affluent areas in a red zone like in Years and Years. Pure nimbyism. Pollution shifted, not reduced.	51.58368376	-0.131952579
It doesn't work here	Roads gridlocked. Taking three tunes as long and our neighbourhood is suffering with the additional fumes and traffic. Please stop and rethink this crazy plan.	51.58824	-0.129434793
It doesn't work here	All this is doing is gridlocking other local roads and forcing emergency services to take longer routes to get to people in need of assistance.	51.58048937	-0.1309895
It doesn't work here	8.44am Day 3. Must be nearly 500 people queuing for W7 bus in Crouch End Broadway. Never seen	51.5787721	-0.1147715

	such a long queue. How dare you mess up public transport for hard working people. Bus now same speed as walking. Walking too unpleasant due to extra traffic.		
It doesn't work here	This trial has caused massive disruption and inconvenience to local residents, road users and likely life threatening were an Emergency vehicle need speedy access. Very badly thought-out idea by the Council team involved.	51.5846025	-0.12835866
It doesn't work here	Gridlock! Residents were not able to get in or out of Crouch End. So many cars unable to move that air pollution must be far worse if not dangerous. Buses could not get through so stations became difficult to get to and buses impossibly crowded.	51.5808765	-0.131216459
It doesn't work here	Can this project stopped immediately??? You are playing with the mental health with people! This is a total disaster.. I am already getting stressed how to get home at night! STOP THIS NOW!	51.5887	-0.129991718
It doesn't work here	Roads are gridlocked and the traffic is at a standstill. Walking through crouch	51.58802785	-0.131216459

	end all you can smell is exhaust fumes due to the gridlock its awful.		
It doesn't work here	People are using our street to avoid traffic light between Priory Road & Park Road. Park Road, Priory Road & Tottenham Lane have become gridlocked at Peak Times and extremely busy all other times. Buses now take double time to get anywhere	51.58661265	-0.123925952
It doesn't work here	I agree with the concept of reducing through-traffic in Crouch End to improve air quality; however the trial so far (2 days in) has yet to achieve this. More aggressive traffic restrictions required on Crouch End Hill to protect Coleridge School children	51.57585086	-0.129852243
It doesn't work here	NO NO NO: HIDEOUS IDEA CREATED BY BRAINLESS HIPSTERS WHO DONT EVEN LIVE HERE. MIDDLE LANE NOW ANNEXED. NO ACCESS TO PARK RD. HAIR BRAINED NOT WANTED GET RID OF IT NOW	51.582182	-0.130061844
It doesn't work here	It's made the traffic so much worse - and our road is a dangerous cut through (let alone the	51.58539333	-0.130828856

	whole of Crouch getting gridlocked!)		
It doesn't work here	Our road has become dangerously busy with speeding cars making haphazard manoeuvres! Cars are backed up. Fumes on what is a cycling and walking route has turned into a polluting rat run. This needs sorting ASAP. We feel as a street completely forgotten.	51.58564512	-0.125974466
It doesn't work here	Park Avenue South has far more traffic running through it at speed. Walking into CE after 5pm not pleasant. Pollution level data must be published, before and after results.	51.585486	-0.121346311
It doesn't work here	I can unequivocally say that the traffic has increased disproportionately. Not only was the gridlocked at the junction with Park Road dozens of cars deep. On Tuesday morning the problem was compounded by the collection of household waste trucks	51.58576552	-0.128879
It doesn't work here	seriously. Who was the idiot that suggested this road closure trial in Crouch End. Pollution, noise pollution, verbal	51.58547543	-0.129923681

	abuse and a tail back down the whole of Park Avenue South. For what? Three plants in Middle Lane. Give me a break!!		
It doesn't work here	Disaste! Commute from FP now takes 1.5hrs (20mins before), with 50min wait at W7 stop. Traffic backed up on our street, noisy, dangerous & exhaust fumes. Priory&Park rds traffic even worse. You have created an inequality north & south of Broadway. STOP!	51.58553933	-0.128275707
It doesn't work here	Bloody ridiculous idea. What a mess!	51.58547543	-0.123939112
It doesn't work here	V unsafe! Kids cant play on our street. Exhaust fumes horrific (stagnant cars release more fumes than if moving). closed streets make it unsafe to walk at night. Am pregnant & cant run but had to when was being followed on closed rd. Commuting a disaster	51.585526	-0.130185319
It doesn't work here	This trial has turned Park Avenenue South into a rat run with constant stream of traffic throughouit the day and frequent backlogs at the Park Road junction causing increased air pollution, noise, and a	51.58544672	-0.130185319

	massively less 'liveable' environment.		
It doesn't work here	This road has been ignored in the Trial. The traffic on the road has at least doubled. Drivers speed down the road. Cars back up at the junction with Park Road. Increased pollution+congestion throughout Crouch End.	51.58544445	-0.124976376
It doesn't work here	The closure of Middle Lane has pushed the traffic to Hornsey. It is unclear why the residents bordering Middle Lane are not included in the consultation as we are directly impacted by the road closure - congestion and pollution wise. This does not work.	51.58825228	-0.127876595
It doesn't work here	There is not enough space in comments to cover how many things have been badly thought through on this. Perhaps that is the point?	51.58081027	-0.129261207
It doesn't work here	How will Haringey manage the traffic in Crouch End during future roadworks, which are inevitable. First day of the trial was chaos. Please explain.	51.585792	-0.128879
It doesn't work here	Absolutely awful, the road is constantly clogged and cars are building up. I	51.58546083	-0.128820733

	have heard grown men arguing in the street, using the C word in front of my 5 year old. It takes 1 hour to drive 1.5 miles, cars are gridlocked created more fumes and pollution		
It doesn't work here	A woeful and insensitive scheme planned by fools. Not acceptable at all. 2 GP surgeries have baby clinics and babies are being pushed in buggies in intolerable fumes. Kid cannot get to school. W7 buses gridlocked. Utterly stupid.	51.58256677	-0.116883
It doesn't work here	PLEASE do not go ahead with this, it's a such a bad idea! I work in Crouch End and go via Park Road on both my daily journeys, traffic on Park Road has become impossible and when trying surrounding roads they're the same due to overspill from Park Road.	51.58042003	-0.10804
It doesn't work here	PAS has become a rat run, fast dangerous traffic. Park Road grid locked. My 16 year old uses the W7/W5 to get to an after school job - she risks losing this as is unable to get there on time. Please stop this madness.	51.58554083	-0.126003453

It doesn't work here	PAS is now a rat run, speeding traffic. Park Road is gridlocked. Buses not moving. My daughter's after school job is in jeopardy as the buses are so slow she cannot get to work! Pollution + risk. Please stop this madness.	51.58545417	-0.131048
It doesn't work here	I don't know what needs to be done to improve the pollution in Crouch End, but what I do know, is that the current changes are not the answer. Perhaps banning all petrol and diesel cars in favour of electric vehicles is the only answer.	51.58540139	-0.129711116
It doesn't work here	W7 bus being severely delayed and traffic fumes on Park Road in peak times dreadful. It makes walking and using public transport harder so does not meet the objective.	51.585792	-0.131562984
It doesn't work here	Increased traffic on our road and cars are much faster as they are using it as a rat run to avoid the traffic lights at the Victoria Stakes	51.58544805	-0.13005
It doesn't work here	all traffic is being congested into fewer streets. people are now finding alternative routes, within the same area,so moving the problem not	51.587109	-0.121145039

	solving it. the past fews days of the trail have made the congestion far worse in the surrounding areas.		
It doesn't work here	Day 4. No sign of W7 or W3 bus after 20 min wait at Finsbury Park. Queues longer than I've ever seen at 7.20pm. Getting an Uber. Will now give up the bus and switch to car for commute instead. Well done Haringey council.	51.56512	-0.12373
It doesn't work here	See you at the demonstration on Friday 11th at 6.30pm. Excellent idea as the community rage this has created needs to be addressed. We live in a dead end street accessed via Middle Rd - which we can't get in & out of in under 25 mins of engine idling!	51.58199572	-0.126953291
It doesn't work here	The congestion, pollution and gridlock is dreadful. This was raised at public consultation meeting but has been ignored. It is making living here miserable. Please abandon this trial as soon as possible	51.587007	-0.121801928
It doesn't work here	The traffic has become unbearable since the start of the scheme. The noise and fumes from gridlocked	51.58678169	-0.118376211

	traffic is appalling and has made our street and the surrounding area deeply unpleasant.		
It doesn't work here	As a cyclist, the gridlocked roads have become much more dangerous, with cars doing sudden u-turns in stationary traffic, or emerging 'unsighted' between the traffic. The pollution from fumes is also significantly worse. Please abandon this mad scheme.	51.58712699	-0.128675894
It doesn't work here	Hopefully I have Been able to select the right location on the map. If not, please be advised that using the car this evening, it took me 40 minutes to get from Crouch End Hill to Oak Avenue via Park Road. Surely not what was intended by this trial.	51.5838	-0.1241495
It doesn't work here	Started again! Mega row with a so called councillor. Mega jams on The Broadway right up to Hornsey Lane. Elder is now a motorway. Rosebery jammed. Chaos.	51.58164865	-0.12686689
It doesn't work here	It would be much more positive to encourage cycling and walking by providing secure cycle	51.57971	-0.1241495

	<p>parks in town outside shops etc closing roads like Middle Lane only moves the problem elsewhere. Priory Rd - PAS - Park Rd are all being used instead etc.</p>		
It doesn't work here	<p>Day 4 and grid lock getting worse on Priory Road. Please listen to residents and halt this trial. The knock on for Muswell Hill and Turnpike Lane is equally miserable. Really not thought through or communicated.</p>	51.58661001	-0.11226
It doesn't work here	<p>4 men standing at the barriers on Middle Lane/Priory Road, one to open a barrier for me and 3 to stand watching, another 3 milling around near Grove House Road, meanwhile traffic is backed up all through Crouch End and Hornsey High St. NONSENSE!</p>	51.58705461	-0.123804714
It doesn't work here	<p>More condensed traffic, more idle time =more pollution = poorer air quality for pedestrians and cyclists, as well as slower public transport, pushing traffic to different streets so just moving a problem! A terribly thought out solution</p>	51.58155808	-0.12376082

It doesn't work here	Long queues and waits for buses over 40 minutes, people arguing in the streets and at bus stops, noise pollution from beeping in traffic jams, air pollution from idle traffic, cyclists taking to the pavement and at risk from fed up drivers doing u turns	51.586179	-0.133081477
It doesn't work here	Better to make Rokesly and Elmfield one way, double yellows on one side of the road where traffic bottle necks - too narrow for buses: Park road near cricket ground, middle lane junction with grove house road and Tottenham lane outside the queens.	51.57301503	-0.118405591
It doesn't work here	late for work 3x this week, given official warning, now at risk of losing my job! 1.5 hour journey priory road to finsbury park! shame on you for not ending trial early, evidence and feedback is damning!	51.586179	-0.123949841
It doesn't work here	Traffic fumes and queues yesterday along Tottenham Lane were far worse with Middle lane closed.	51.58623	-0.123263196

It doesn't work here	Strongly oppose the changes. Park Road has become completely traffic bound. Unacceptable increased of pollution llevels of	51.5860258	-0.129976379
It doesn't work here	Closing three major roads is madness, it's just caused massive congestion on Park Road & Tottenham Lane. Walking around those areas (shops, GP etc) is now extremely unpleasant, and having to drive anywhere south from Hornsey is an absolute nightmare.	51.5877811	-0.114727066
It doesn't work here	what a waste of money spend it on socail care, if you are a local resident and want to cut through crouch end it will be a nightmare, that why lots of cars are doing uturns so that they can travel where they want to get across cround end.	51.57974532	-0.1146995
It doesn't work here	this causes people to travel further so cause more polution, shorly you could spend your time and money on social care in our community.	51.57942529	-0.129261207
It doesn't work here	Concentrated pollution levels already being felt. I am going to need to abandon bus travel to	51.58565471	-0.129433181

	Finsbury park and use the car to get to Highgate station.		
It doesn't work here	DISASTER!!! STOP THIS UTTER, UTTER MADNESS!!!!. MORE TRAFFIC + MORE POLLUTION! What on earth is going on with Haringey??? Any idiot could tell you this was a recipe for absolute mayhem. People are incandescent with rage!!! Scrap this immediately!!!	51.58629025	-0.1241495
It doesn't work here	This trial is not working. Council has stated greener air for our children as a reason for the changes, yet all the (now congested) traffic has been funnelled past 3 primary sites, oh and Hornsey high street!	51.586251	-0.13021802
It doesn't work here	Traffic from Middle Lane now diverted down Park Ave South making it a high speed rat run. Increased congestion and pollution on Park Road. A disaster.	51.58563085	-0.124550656
It doesn't work here	Our residential street has become a rat run with cars speeding along with no respect for pedestrians, many who have small children with them as we	51.58559583	-0.122748212

	have an entrance to Priory Park off our road.		
It doesn't work here	This trial absolutely does not work. All the traffic has just been displaced onto other residential roads. Please please do not implement this trial.	51.586179	-0.118268
It doesn't work here	Park Avenue Sth has become a rat run (over double vehicle nos). If you do go ahead with this scheme permanently, we suggest closing the road with no entry signs at the Park Road end, stopping vehicles leaving or entering the road, enforced by a camera.	51.58539563	-0.129484966
It doesn't work here	Walking to the various amenities on Park Road has become a much more unhealthy and unpleasant experience as there is so much more traffic and pollution. My suggestion is to not close Middle Lane - look at other measures.	51.58066804	-0.126975373
It doesn't work here	Travel by public transport takes MUCH longer since the trial has been in place	51.58221477	-0.115802
It doesn't work here	I regularly have to drive to the Highgate Village. In order to do so I have to go out onto Tottenham Lane and then get stuck in traffic jams whichever route I take. This doubles	51.583794	-0.12175875

	journey time and pollution. Hopeless!		
It doesn't work here	Traffic on Park Avenue South has doubled. There is greatly increased traffic on both Park Road and Priory Road in both directions affecting the bus timetables and peoples journeys. Pedestrians and cyclists are suffering increases in fumes.	51.58558782	-0.11895075
It doesn't work here	Buses are being held up in congestion at rush hours. Don't close Middle Lane as it is causing serious problems for W7, 91, 41 and other buses in rush hours.	51.5820281	-0.122909144
It doesn't work here	The initiative has led to chaos across the broadway, park road, crouch end hill, crouch hill, Tottenham lane and hornsey high street! It made it extremely frustrating for commuters, locals and businesses. I can't wait for the nonsense to end.	51.583299	-0.125612
It doesn't work here	Gridlocked traffic. Stagnant cars create far more fumes. Definitely does not make Crouch end more liveable.. has had the complete opposite effect!	51.5812635	-0.123906926

It doesn't work here	My family's weekly weekend walk to grocery shop in CE today was unpleasant. Car fumes all along Tottenham Lane from static, queued traffic gave my family members tight chests. This had never happened prior to the increase in traffic due to the trial.	51.5824785	-0.13021802
It doesn't work here	Terrible traffic. Standstill jams polluting our area. Not good for environment or my stress levels. Pls stop it now.	51.58302478	-0.121927456
It doesn't work here	Not clear what exact problem this was trying to address. It has certainly caused as many or more others. No logic to closing middle lane - it is a much needed thoroughfare. Overwhelming opposition to this. The trial should be stopped early..	51.588942	-0.133704832
It doesn't work here	Disaster - make it stop please and you should do it as soon as possible.	51.58050137	-0.121975735
It doesn't work here	Greatly increased vehicle numbers and cars travelling faster than speed limit. So more noise, pollution and safety issues. Suggest close PAS with no entry and no exits signs enforced by a camera.	51.58539563	-0.1139705

It doesn't work here	Don't close Middle Lane as this will have a detrimental effect on all of Crouch End. Instead stop parking at its northern end as this is the only part that has a problem with congestion.	51.58675797	-0.124713715
It doesn't work here	the junction at the bottom of Muswell Hill does not work with queues of traffic building up in all directions and frequent accidents. It would be much better to have a roundabout rather than the current set up.	51.58771708	-0.12373
It doesn't work here	Road closure at top of Middle Lane pushes traffic onto Park Road and Tottenham Lane. Better way of improving W3 route would be to stop all parking on the side of middle Lane adjacent to Priory Park	51.58645466	-0.116182164
It doesn't work here	This has turned Etheldene Avenue into a rat run. This is quiet residential street and it is nightmare now with filthy polluting cars sitting here beeping constantly.	51.58708798	-0.121846989
It doesn't work here	The road traffic has increased noticeably. The intersection at the end of the road doesn't work and therefore cars build up	51.58714793	-0.123898644

	and get annoyed. This has increased as traffic on park road has increased and rat runners use their imagination more to get around		
It doesn't work here	Air quality noticeably deteriorated due to extra traffic. Fumes from traffic jams terrible since trial began. What a terrible idea. For whose benefit is this? Certainly not residents of Crouch End.	51.579267	-0.115130738
It doesn't work here	Nightmare traffic. Air quality disgusting. Terrible idea. Turned Crouch End into a permanent traffic jam.	51.579267	-0.125475913
It doesn't work here	This is a complete disaster. Who ever approved this should be sacked.	51.579267	-0.129786328
It doesn't work here	Park Rd badly congested during rush hour - buses not able to run to time - & pollution levels palpably worse! How are they being monitored? Particularly in the areas surrounding the closures? Closed roads are less safe for pedestrians!	51.58552805	-0.123349026
It doesn't work here	Enormous increase in the numbers of cars cutting through Park Avenue South driving on the	51.585792	-0.122381

	wrong side of the road around the blind bend.		
It doesn't work here	Attempting to get to get from Muswell Hill to Crouch End by bus at 3.45 on Tuesday I waited 25 minutes instead of the usual average of about 4 minutes. I then had to get off one stop early and walk as it was quicker than the bus.	51.59136	-0.121954278
It doesn't work here	The W7 has been slowed down significantly. Journeys are taking 3-4 times as long as usual.	51.57880019	0.070027515
It doesn't work here	Traffic at peak hours has become appalling on Park Avenue South And Pek Rd in particular. This is deeply problematic for a whole host of reasons. 1) pollution levels has sky rocketed and is worst when children go to school. 2) traffic congestion	51.58535267	-0.12371625
It doesn't work here	Traffic back to back. Fumes on grocers & coffee shops where we sit outside. Unbelievable transport delays. Pls engage w residents+businesses. We want to make crouchend better but not in this dictatorial fashion. Do	51.58466119	7.19668

	decision makers live here? Unlikely!!		
It doesn't work here	Absolutely crazy idea. You close a thoroughfare that has 3500 cars on it and now they speed down rat runs and block other arteries inc Park road. Pollution is terrible and transport seizes up. dangerous and badly thought out. I can no longer ride my bike	51.58488141	-0.125395887
It doesn't work here	My comment is regarding my commute and the amazing w7 drivers who because of this trial spend their breaks sitting I'm traffic. This isnt good for me as a commuter or anyone else using the roads at this time. 2 hours round journey.. no way!	51.58483404	-0.123663739
It doesn't work here	Since the trial began, Park Avenue South has become a busy road and the smell of fumes on Park Road have increased.	51.585486	-0.116697148
It doesn't work here	The walk to Hornsey rail station is a fume filled nightmare - it is really really unpleasant	51.583416	-0.129205057
It doesn't work here	I cannot find anything positive to say about it. At peak times Park Road is very congested or gridlocked with traffic	51.581427	-0.117491082

	backed up in Shanklin Road. Emergency vehicles have trouble getting through. At times the noise of idling engines,		
It doesn't work here	The trial is clearly having the total reverse of its desired effect. Air quality is worse, traffic is worse, mood is worse, safety is worse, public transport is worse. I can't think of one positive outcome, other than an inflated ego of the council.	51.5887	-0.123821095
It doesn't work here	The traffic has just redirected itself and driving way too fast. I chose to live here because the road was quiet and this is not making this part of Crouch End more "liveable".	51.585566	-0.13382037
It doesn't work here	The most important thing to make Crouch End liveable is to ensure that the W7 and W3 bus routes continue to run smoothly. The W7 route is being severely affected by the amount of traffic.	51.58458862	-0.131878451
It doesn't work here	Haringey's dystopian vision of a future where the unfortunates are condemned to live in increasingly polluted air outside the designated clean air bubble. An	51.58824	-0.133945878

	unmitigated disaster. The judgement of those wasting money on the project must be questioned.		
It doesn't work here	the increased traffic is leading to pollution, stress, bus delays etc. Many people cannot walk or cycle.	51.58693995	-0.133798913
It doesn't work here	Is the calibre of planners that dire that they proposed this project as viable?Horrendous spike in pollution,paralysing gridlock,an inept waste of resource & money; easily predictable at outset.How to appear incompetent & alienate a community in one step	51.58878	-0.12383
It doesn't work here	A 5-10min max journey in the car (yes I need the car as coming from an after school club with my 6 year old - too far to walk) took 25 minutes. This is really impacting on peoples lives here in a very UNliveable way	51.58370109	-0.12383
It doesn't work here	The closure of middle lane has turned Park Avenue South into a rat run and created significant congestion on both Park Rd and Priory Rd	51.58525102	-0.12383
It doesn't work here	Park Avenue South is experiencing	51.58544445	-0.123609989

	unprecedented levels of rat running. Not only does this compromise the safety of our neighbourhood, but it has also increased pollution levels as cars sit in queues waiting to turn left and pull out onto Park Road.		
It doesn't work here	Experience so far suggests this is counter to any objective of decreasing pollution as it causes bottlenecks. It also makes for greater hazard as driver's lose patience. It has increased traffic and congestion on my road significantly	51.58576131	-0.131508306
It doesn't work here	The scheme has caused additional traffic and pollution on Priory Road. During peak periods (08:30 - 09:30 and 15:30 - 19:00) traffic is frequently at a standstill Eastbound. W3 and 144 busses are frequently delayed by congestion.	51.58691099	-0.128879
It doesn't work here	A temporary No Left Turn sign has been placed at the junction of Park Avenue South and Park Road. From about 3.15 to 3.30 pm today we saw 9 out of 12 vehicles ignore the sign and turn left. The 3 that turned right	51.58519451	-0.14255

	immediately turned round in Park Road.		
It doesn't work here	I walked from Crouch End along Park Road on Friday 11 October at about 4.15pm. The traffic along Park Road tailed back from the bottom of Muswell Hill to Waitrose and hardly moved during my entire walk. I could smell the fumes. I passed two buses.	51.58250658	-0.123821304
It doesn't work here	I have noticed increased pollution and traffic especially up past the medical centre where people park on both sides of the road. Awful idea and i worry for the health of the secondary school kids.	51.58515473	-0.131901451
It doesn't work here	Fr 11th Oct: I walked along Middle Lane to Crouch End. Middle Lane was almost deserted. As a lone elderly woman, I began to feel apprehensive, in the same way that I would walking alone along an alleyway at night. I will avoid this area during the trial.	51.58370589	-0.131782815
It doesn't work here	When I do have to drive I am having to drive longer routes, and also get stuck in traffic, meaning the	51.5853945	-0.132007197

	increase in pollution is two fold.		
It doesn't work here	I do not live in the Haringey area anymore, but I work locally and it is an absolute nightmare. You have to stop it and return it back to normal.	51.587709	-0.132039772
It doesn't work here	The increase in air and noise pollution is terrible. When I'm at home now I feel short of breath, have a headache and struggle to concentrate. Please think about how this affects those of us who live here.	51.58011131	-0.131418653
It doesn't work here	Pollution levels have increased dramatically in this location as a result of the Middle Lane Closure. You should be measuring how pollution has changed on Park Road and the other main roads and using this to inform your decisions.	51.58677671	-0.117008
It doesn't work here	Bicycles are being forced to use the pavement due to the significant congestion, in particular on narrow parts of the road (see pin). This is not linked to parking - an area where no parking allowed. So don't close Middle Lane	51.58336144	-0.1259405

It doesn't work here	Dont shut Middle Lane. The areas that have the shops and pedestrians are Tottenham Lane and Park Road, which have boom more polluted and congested. Middle Lane is little used as it has few shops.	51.58055068	-0.130773381
It doesn't work here	Can you look into providing a bus from Hornsey to Highgate and Hampstead? This east to west route is one of the key reasons cars travel through the area and currently this is a difficult journey without a car. Shutting Middle Lane does not stop these car	51.58681463	-0.123399396
It doesn't work here	Don't close Middle Lane as it will lead to higher pollution levels on Park Road and Tottenham Lane, which are already high, and are key shopping areas used by many pedestrians. Middle Lane is much less frequented by pedestrians.	51.58060137	-0.1235285
It doesn't work here	Congestion and pollution are more than before. Why close Middle Lane for bikes and pedestrians when up and down of this street there is a massive traffic?? It doesn't make	51.58704661	-0.130448767

	sense!! Please don't shut Middle Lane because it is a massive problem for people.		
It doesn't work here	stop it	51.58667438	-0.131392706
It doesn't work here	DON'T AGREE WITH COMMENTS ABOUT HOW THINGS WILL GET BETTER IN LONG TERM, BUS JOURNEY TO FINSBURY PARK TAKING MORE THAN AN HOUR, DRIVERS WON'T CONSIDER THAT AS AN ALTERNATIVE, NOR THE 55 MINUTE WALK. THIS IS NOT WORKING SHORT TERM AND WON'T WORK IN LONG	51.58674563	-0.1235285
It doesn't work here	WHAT HAVE YOU DONE? We all want less traffic and cleaner air. You have created traffic chaos and massive delays. Pollution on my street horrendous, I cannot open windows anymore.	51.58460995	-0.123946407
It doesn't work here	I travel to Brent Cross every day for work and there is no other option BUT to use the car. So instead of me taking 30min I now spend an extra 30 min idling in traffic along Tottenham lane.	51.58381477	-0.120248
It doesn't work here	Park Road completely gridlocked, buses taking	51.58550005	-0.129914694

	over 50 minutes to get from Finsbury to Hornsey Health Centre (previously 15 minutes). Exhaust fumes from stand still traffic impacting asthma suffers and is significantly worse than previous.		
It doesn't work here	This has resulted in more traffic travelling along Muswell Hill road and onto Archway then Holloway rd as an alternative to going through Crouch End due to the increased congestion on Park Road leading to Hornsey rise and Hollway rd.	51.589374	-0.132372458
It doesn't work here	W3 buses have been completely impossible in the evenings since the trial started. I get to Finsbury Park around 6.45 most evenings during the week and have had to wait between 15 and 30 minutes for a bus every day.	51.57852537	-0.123612364
It doesn't work here	W7 badly affected. Large queues and delays. Our road gridlocked with bad fumes from idling cars.Very difficult to back out of our driveways due to impatient drivers who cannot see us and charge up the street. One accident already.	51.58621467	-0.130828856

It doesn't work here	A complete fiasco with zero notification for most residents.. The 'oasis' at the top of Middle Lane has been used by virtually no one and that's hardly surprising with increased air pollution from Park Road wafting across the concrete road blocks.	51.58559266	-0.12894401
It doesn't work here	With a major traffic artery of the triangle severed, the knock on affect has been truly appalling in terms of frequent traffic gridlocks along Park and Priory Road and a major increase in traffic using Park Avenue South as a rat run.	51.58541267	-0.123548204
It doesn't work here	I have to drive through Central Crouch End to get to work, as a self employed musician I have no alternative to driving with my equipment the roads are much busier, slower with these closures	51.5820681	-0.122206845
It doesn't work here	A week and a half into this trial and yesterday at 16.30 the main roads were gridlocked again. There have been better and worse days but clearly this trial does not indicate that people start choosing different routes or use their cars less.	51.58129476	-0.132349565

It doesn't work here	traffic is redirecting through haringey park to get away from the bottleneck you have created through park road and middle lane. How will this affect already residents of haringey park when the new town hall flats are built. More people, more cars, STOP	51.58149003	-0.12771541
It doesn't work here	We live off the Archway Road and use Crouch End for shopping every day. It is really difficult to see why they want to close Middle Lane. Makes no sense at all. What on earth are the Planners thinking (??Thinking??) about?	51.57494684	-0.1323988
It doesn't work here	This is the most ridiculous boondoggle I've seen out of a local council for a long time. Stop victimizing motorists.	51.584496	-0.123512402
It doesn't work here	I go to gym in Hornsea. I used to run there along Priory Road. Now Priory Road is jammed with queuing traffic and air is terrible. I'm doing myself more harm than good. I'll take the car in future and warm up on the treadmill.	51.58709087	-0.123906926
It doesn't work here	The end of Middle lane where it joins Park Road and also the other end	51.58063249	-0.114259004

	near Hornsey Lane are very quiet at night and therefore scary for people to walk down. I think it will encourage crime at night as it is super dark and quiet with no one around.		
It doesn't work here	I live and work in Haringey. I have to drive to schools, hospitals, social services premises. I had to cancel seeing patients over the last two weeks. Please consider alternatives. Park Road is a car park!	51.585072	-0.13174875
It doesn't work here	I fully support the objective but the proposed way is not working. Quite the opposite, it is creating congestion in adjacent streets I am now forced to take longer routes with increased journey times and pollution. Speed bumps please	51.585846	-0.115028
It doesn't work here	Much higher traffic on our residential road, cars are sitting in the traffic as park road is gridlocked, everything is moving slow.	51.58536139	-0.1172195
It doesn't work here	All you have done is moved the traffic somewhere else and increased pollution and caused massive	51.58477475	-0.116793168

	inconvenience in the process		
It doesn't work here	Hornsey High Street has greater congestion at peak times. No safety valve when blocked by delivery trucks around Tesco.	51.5874679	-0.123177399
It doesn't work here	Traffic builds up on Tottenham lane in Peak - not helped by parking on both sides	51.58115473	-0.133651884
It doesn't work here	I've started parking my car to the East side of Park Road - I can't get to work each day without driving (I work outside of London) The closure has just misplaced the traffic and is causing congestion on the terribly potholed and unkempt side streets.	51.57950797	-0.129174784
It doesn't work here	A few residential streets favoured with reduced motorised traffic at the expense of luckless pedestrians, including babies, children + vulnerable groups frequenting the heart of Crouch End. Huge increase in traffic/ pollution and waste of public money.	51.57931629	-0.124164418
It doesn't work here	I only drive when absolutely necessary and do not take my car for short or unnecessary	51.58061013	-0.125580624

	<p>journeys. During one of these necessary journeys I had to take a significantly longer route because I was stuck in traffic for so long. Not impressed.</p>		
It doesn't work here	<p>The traffic on Hornsey High Street junction with Middle Lane and Junction with Church Lane is gridlocked one the mornings and between 3.15 and 7. The pedestrians and children at St Mary's CofE school inhale increased fumes.</p>	51.5868013	-0.123794273
It doesn't work here	<p>A few streets get reduced noise/pollution at the expense of luckless pedestrians (who we should be encouraging) including vulnerable adults/children who suffer foul air,noise and disruption. Hopeless waste of public money. Apols if I've commented twice.</p>	51.5798955	-0.121779182
It doesn't work here	<p>increased localised vehicle congestion, causing traffic to race down cut through streets which were previously unaffected. concern for emergency vehicles holdups caused by the road closure, air quality</p>	51.58455449	-0.118814215

	significantly worse due to standstill vehicles.		
It doesn't work here	Thought up by idiots!	51.58072	-0.121724783
It doesn't work here	Pollution levels and congestion have increased in the areas of Crouch End with the most community shops with the most pedestrians. Leave Middle Lane open to reduce traffic on the main shopping roads.	51.58077472	-0.131530033
It doesn't work here	Too much congestion and air pollution	51.5804547	-0.116546944
It doesn't work here	More congestion along Tottenham Lane and Park Road. Buses backed up and gridlock at a time you want to be able to use public transport.	51.57989466	-0.129872159
It doesn't work here	The closure of Middle Lane means that local people have to make a 20-40 minute detour instead of the usual 2 minutes it takes to drive down Middle Lane due to the increased volume of traffic on detour roads causing more pollution and anxiety for elderly.	51.588222	-0.123458339
It doesn't work here	Shutting middle lane where it meets Priory road. Has caused absolute chaos on all other roads around crouch end and particularly within Crouch End, which this	51.58705461	-0.1457405

	stupid idea was meant to ease. My wife has been taking 30 minutes longer in the morning and eve		
It doesn't work here	Park Ave South has become a rat run, people's speeding, which is dangerous as exit from park on blind bend, backed up traffic and public transport, particularly W7 badly effected	51.58536	-0.12368162
It doesn't work here	An ill thought out trial which has angered local residents and show little respect for hard working people on their daily commute to Finsbury Park. Bus journeys along Park Road and Tottenham Lane have become lengthy & insufferable. An excess of pollution	51.587034	-0.116136554
It doesn't work here	Don't shut Middle Lane. W7 and other key buses have been significantly delayed in rush hours causing big problems for residents trying to get to and from work. There is no tube here - buses need to work efficiently and without delays.	51.58012801	-0.133562878
It doesn't work here	It is clear that to get people out of their cars is a good idea. However to cause this disruption to	51.58087	-0.128897377

	the W7 bus route is totally unacceptable. We need a dedicated bus lane (even if it has to be diverted)		
It doesn't work here	Although the idea of a traffic free / calmed area is a good one , unfortunately this isn't the right place. There is simply too much traffic and causes bad congestion in surrounding residential areas which defeats the object somewhat.	51.587433	-0.129541107
It doesn't work here	Much heavier, faster traffic	51.58548138	-0.121868447
It doesn't work here	The trial defeats the purpose. There is more air pollution and buses are delayed and stuck in traffic. Therefor it is more difficult to get around crouch end.	51.58567201	-0.121943549
It doesn't work here	Middle lane is not a Road is not an relaxing sitting area, no one wants to watch traffic and breath in fumes as drivers frustratingly navigate their journey around all the roads	51.58149003	-0.125729537
It doesn't work here	Another awful gated "commune". Strangling Crouch End while choking the surrounding areas. The madness continues..	51.58220141	-0.123609989

It doesn't work here	Middle lane is a vital access route for those of us on the other side of the park. We live in Crouch End too and shouldn't be disenfranchised	51.58694528	-0.146086434
It doesn't work here	since the closure of middle lane , barrington road become a racing track , drivers ignoring 20 mph speed limit because park road is clogged up	51.583848	-0.11681
It doesn't work here	bus journeys badly effected by gridlocked traffic. Ban parking in Middle Lane and put cycle lanes/walkways there instead rather than close road	51.58549517	-0.121658233
It doesn't work here	This just increases congestion and pollution on the roads around Crouch End - namely Park Road and Priory Road.	51.57968981	-0.117019013
It doesn't work here	During the trial it has encouraged dangerous and aggressive driving at an already confusing and dangerous junction.	51.58730542	-0.122900372
It doesn't work here	It has caused longer back ups of traffic than usual, increasing pollution and journey times	51.58684574	-0.123802081
It doesn't work here	Closing Middle Lane makes the traffic worse everywhere else and damages trade for the	51.5872066	-0.13274

	shops and businesses on it		
It doesn't work here	Closing Middle Lane has the effect of greatly increasing pollution in streets that are far more residential. Park Road, Priory Road, Park Avenue South, Farrer Road. Middle Lane is relatively unpopulated so it is difficult to see why it was chosen.hosen	51.58563085	-0.117512
It doesn't work here	Most of the traffic is not residents, it is going through Crouch End. These vehicles are not going to take the bus with their deliveries or get on a bike. In Park Avenue South there is now commercial traffic from 6 o'clock in the morning.	51.58563085	-0.131073788
It doesn't work here	Traffic is dreadful all around Crouch End both in rush hour and at other times. Our road has become a cut through for cars avoiding Tottenham Lane. What exactly are you trying to achieve as it's unclear. Traffic jams and pollution?	51.58445476	-0.135764972
It doesn't work here	Appalling gridlock of traffic and pollution at the point where there is the highest concentration of people	51.5804265	-0.122061566

It doesn't work here	Stationary traffic in an area of high pedestrian usage with consequent ill effects from pollution	51.5838	-0.119701222
It doesn't work here	A pleasant road turned into a rat run	51.586542	-0.123306111
It doesn't work here	St Mar'ys school Infants school experienced dreadful air quality before the trial as the Church Rd / Horney High St junction is a notorious bottleneck. By displacing Middle Lane traffic onto this junction has made this much worse.	51.58778432	-0.119036034
It doesn't work here	The pedestrian/cyclist space this trial has created in the wrong place! The main road is now jammed with stationary, fuming traffic and drivers! Just around the corner is a delightful and underutilised green space set back from the main road.	51.58039069	-0.121836261
It doesn't work here	It creates congestion on the other main shopping streets.	51.58040136	-0.123724536
It doesn't work here	Crouch End itself is still very busy with traffic, and the pavements are blocked with signs about road closures. Middle Lane and environs is quieter, almost eerie, but the traffic on Priory	51.58667524	-0.125559167

	and Park Road is significantly worse.		
It doesn't work here	W3 route also badly affected, buses exiting AP have been unable to turn left into Priory Road due to traffic queuing for Park Road. Increased traffic on Park Rd, Tottenham Lane, Church Lane and Hornsey High St has increased pollution for 4 local schools.	51.58617468	-0.121996217
It doesn't work here	The Liveable Crouch End trial really does not work as it is causing traffic chaos and worrying levels of idling in cars which concerns me enormously as my child and I walk these streets and constantly breathe in the pollution. Please don't go ahead!	51.587007	-0.129704724
It doesn't work here	Bus number 41 now very erratic. Have had to walk home from work (40 minutes) on (now) v polluted roads on 4 occasions. I'm on my feet all day and now I can't use public transport?	51.57490737	-0.122466853
It doesn't work here	Regularly congested. Much more than previously. Only benefit of entire scheme is 1 minute shaved off W3 bus route.	51.5841081	-0.121718243

	Really? Is it worth it for that?		
It doesn't work here	Stark increase in traffic and the increased pollution is affecting my weak lungs.	51.58558804	-0.12346875
It doesn't work here	Has created traffic confusion and many delays	51.57970796	-0.12320295
It doesn't work here	I imagine that your hoped for outcome was that the mind numbing gridlock and the dreadful impact on local people would improve. Middle Lane would benefit from road humps and widening the pavement at regular intervals to slow down vehicles.	51.5846025	-0.129704724
It doesn't work here	I live with my 85 year old aunt who is disabled. What should have taken no more than 5 mins max to drive Medical center to 20 mins, mostly sitting in traffic creating more fumes for the environment. This project is NOT working.	51.58410788	-0.124915437
It doesn't work here	U claim to do this for environment & to make crouchend walkable. u have done the reverse. u aren't listening. Middle lane is unsafe now and you have diverted traffic	51.58596244	-0.124529198

	elsewhere, INCREASING pollution.		
It doesn't work here	The fumes on Tottenham In awful. So much traffic. almost got run over and asthma runs in our family. We cannot walk there anymore or shop at any of grocers cause of fumes. Pls engage w libdem councillors which you've refused to do. We didnt vote for you!	51.58230516	-0.123745993
It doesn't work here	Long queues to turn out of Cranley Gardens	51.58637661	-0.1291085
It doesn't work here	Congestion along Park Rd and Tottenham Lane creates far more exhaust emissions than moving traffic. I have found it so unpleasant to walk around the centre of Crouch End that I have stopped going there for shopping.	51.58056137	-0.121482209
It doesn't work here	Tottenham Lane is very congested, particularly at junction with Ferme Park road where there always seem to be tailbacks at both roads. This particularly affects the w3 and 41 bus routes.	51.5822481	-0.122019147
It doesn't work here	Priory Road is much busier than usual during peak times. This slows down the W3 and 144 which are the buses I mainly rely on to get to a	51.58674797	-0.130472

	<p>tube station. W7 so badly affected by traffic gridlock. Bus/walk my preferred way to get around, now less 'liveable'</p>		
It doesn't work here	<p>Gradually became a rat run for drivers avoiding the snarl ups created.</p>	51.577209	-0.1261385
It doesn't work here	<p>Utterly ridiculous. You've increased traffic and pollution - especially outside Rokesly school. Instead, improve public transport in CE by restricting parking to one side of the road so buses can pass each other. That would make CE more liveable.</p>	51.578907	-0.12396057
It doesn't work here	<p>1. Park Rd and Priory Rd congestion during rush hours impossible for bus routes and emergency vehicles (the most vulnerable hardest hit:- the ill, the elderly & those with impaired mobility).</p>	51.58521473	-0.12509
It doesn't work here	<p>Having quite zones free of traffic is a nice idea but rather impractical in North London. North London has increasingly a high density of traffic with a little spare capacity. Therefore it is not surprising then if closing a road such as Middle Lane lea</p>	51.586386	-0.1291995

It doesn't work here	I travel to work to Stroud Green on the W7. On 1.10.19 I left work at 20.30 pm. TFL info advised 9mins delay. I set off walking and got home at 21.05. No W7 service passed me in the 35mins.	51.57792114	-0.129485921
It doesn't work here	Congestion during the trial period caused an unacceptable increase in levels of exhaust fumes. We push our grandchildren along Park Rd to the Library and playgroups. Frequent gridlock of static vehicles with engines running.	51.58146808	-0.129501272
It doesn't work here	I frequently walk along Middle Lane and previously it's never felt unpleasant however it now feels like a ghost town and certainly at dusk I will not feel safe walking alone.	51.5846025	-0.123609989
It doesn't work here	No prior warning. No consultation. Leaflet arrived two days after start of trial. No science, no expertise. Wishful thinking. Everyone wants calmer streets, less pollution. This 'trial' creates more pollution, extends car journeys three or four fold.	51.58439858	-0.131592238

It doesn't work here	Vast increase in traffic particularly in the rush hour. This is particularly a problem as cars come around the blind bend at speed assuming it's a one way street.	51.58562329	-0.123872594
It doesn't work here	In this sheltered housing complex the road closure is causing difficulties to carers getting to clients on time. As well as the gridlock the route in and out is convoluted adding to traveling distance. Carers have a very tight schedule.	51.5824155	-0.121889905
It doesn't work here	The scheme doesn't meet its objective and merely displaces traffic to poorer areas on the periphery of the zone. These areas like Hornsey High Street are most in need of improvements and making the pollution worst won't help that.	51.58749457	-0.1261115
It doesn't work here	Lost count of number of cyclists now cycling down the pavement along Park Road and Cranley Gardens. Making my 6 year old's walk to school hazardous.	51.584793	-0.122300044
It doesn't work here	At the very best, traffic chaos starts to build here from about 4pm onwards, gradually building over the	51.58272894	-0.12378165

	period, going further back in each direction until it reaches Crouch End Broadway for Northbound vehicles and to Victoria Stakes pub for Southbound.		
It doesn't work here	Listen to the residents and stop this madness. It is utterly ill-conceived and serves no useful purpose. The trial has created the very problem that it purports to solve.	51.58078805	-0.12383454
It doesn't work here	Terrible congestion on roads around middle lane, blockages, bus delays, pollution due to idling cars, more milage around diversions. Local restaurants struggling to make deliveries.	51.59084966	-0.123835428
It works here	Ridge road is the same (always quiet) and Ferne park road (08:30-9 mornings and 6-7 evenings appears to be quieter will less congestion up to stroud green road. the w3 (once it arrives after being stuck!) appears quicker.	51.577458	-0.133673069
It works here	Less traffic this morning, which hopefully also means the streets here are safer for everyone. Have seen some nasty accidents on the road	51.57763111	-0.13048728

	because of too much traffic and careless drivers and it's not very pedestrian or cycle friendly around here.		
It works here	It is a great idea to reduce traffic in Crouch End and make the whole area more attractive and accesible for pedestrians and cycists.	51.57971	-0.125663021
It works here	I walk daily to St Marys school Rectory Gardens. The walk is much more pleasant now. Why should we have to breathe the fumes of car drivers who have good alternatives? Bus service would be much improved without all the unnecessary cars.	51.58000134	-0.129261207
It works here	I'm a cyclist and have frequently encountered aggressive driving on both Middle Lane and Hillfield Avenue as drivers try to cut through to Crouch End from Hornsey. Anything that creates quieter spaces for cyclists and pedestrians is good news.	51.58616134	-0.129261207
It works here	There was disruption and gridlock on the first couple of days, but today (Wednesday) everything seems to have calmed down. People are using	51.58048678	-0.117555455

	the newly created spaces - I think this is working.		
It works here	Really support these efforts to cut traffic in the area. Better traffic flow today and a less polluted walk to school for my daughter	51.57876123	-0.12412125
It works here	The trial is going well. Since the 7th traffic has improved, the short journey which took 45mins on monday took the usual 5mins yesterday. No left turn on Farrer and Park Avenue South, should ease the impact for them	51.57978852	-0.13005
It works here	Let's give this bold new plan a chance. In the long run it will make Crouch End town centre a much better place to spend time in. I'm a big fan!	51.57962372	-0.1330065
It works here	Remove parking on one side of road of Park Road and Topsfield Parade to allow the buses through. This would help the unnecessary car drivers, who have yet to hear of the climate emergency or do not care, switch to a less selfish form of transport.	51.582102	-0.113864735
It works here	I cycle on Middle Lane to get to work. No cycle lanes means normally the traffic makes me	51.58662798	-0.124078587

	uncomfortable / lots of pollution from traffic at Crouch End. Since the closure, I've LOVED cycling this road. Dedicated cycle lanes throughout Crouch End please?		
It works here	Feels much safer cycling down Middle Lane - thanks!	51.58149003	-0.123957888
It works here	I support anything that discourages driving in the area to improve air pollution and road safety for our children, and Middle Lane is really pleasant now.	51.58824	-0.125920191
It works here	This has stopped the speeding that had been increasing down Hillfield Avenue since the Sainsbury's opened. Much nicer to walk up and down the hill now.	51.58764919	-0.110860661
It works here	Living as we do between Park Road and Elder Avenue, the trial has brought us significant benefits. The road is INFINITELY quieter and less polluted, safer for pedestrians and cyclists, and a lot easier to park our car.	51.58088139	-0.123659553
It works here	Love the idea of turning this into a permanent public space.	51.58685796	-0.127940968

It works here	The flow of traffic is so much smoother - the top end of Middle Lane is usually clogged by buses trying to squeeze through	51.58696011	-0.131048
It works here	Hillfield Avenue has benefitted from the closure of the road at the north end. Regardless of the success or failure of closing Middle Lane, I'd like to see Hillfield Avenue's closure made permanent.	51.58730792	-0.126803712
It works here	Middle Lane is much safer to cycle and walk on. More vulnerable users on street.	51.58381477	-0.1366415
It works here	Less traffic cutting through Hillfield to Hornsey High Street means the W3 flows better here.	51.58328144	-0.130751923
It works here	We have noticed less traffic on our road, and the reduction in noise volume is appreciated. I think the trial should be for longer to give drivers time to find alternate routes. Having road works at the same time doesn't give a fair chance to the trial	51.58072	-0.129346446
It works here	Much more pleasant walk to Crouch End	51.58622877	-0.123287712

It works here	It's fantastic to see such bold moves being trialled. Don't revert it for a while yet. I cannot see how such a short trail will give you a good sense of whether it's working yet - keep middle lane close through the Christmas period.	51.58047664	-0.12310875
It works here	Keep going - this is exactly the kind of bold, innovative moves we need for the environment, for our air quality and for the future.	51.58037329	-0.121263948
It works here	The road closures are supposed to discourage motorists from unnecessary trips, prioritising people's wellbeing over the convenience of the few. This needs to be explained clearly and resolutely by Liveable Crouch End.	51.58194775	-0.123545813
It works here	we have our own closure in Palace Rd and so there is no through route from Park Rd to Middle Lane via Barrington Rd. The first three/four days of the new scheme saw a lot of congestion on Pa	51.58472142	-0.122078782
It works here	It's caused road rage and dangerous driving. Emergency vehicles stuck	51.585693	-0.11931553

	in traffic, side roads gridlocked. Increased traffic down Cranley Gardens. Increased pollution caused by idling engines. An hour to cover 1.5 miles.		
It works here	The two weeks of the trial have been delightful for us Drastic measures are sometimes needed to make people think and use their car less. Hope the trial was useful in that sense!	51.58068664	-0.133823273
It works here	It felt so nice and quiet, especially during weekends! I heard a lot of people were complaining (probably the ones who don't use public transport) but I really hope it becomes a permanent thing at least for weekends as a compromise. Good luck!	51.58536	-0.124078587
It works here	The trial seemed to reduce the no of parents attempting to park on Haslmere road to drop off at Coleridge. Aggressive parking restrictions are needed round the primary schools. Implement school streets.	51.5752605	-0.119111136
It works here	I really like the idea of these road closures and think it makes Crouch End	51.57791458	-0.12875636

	a better place. The kid-friendly area at the end of Middle Lane I thought was superb and made walking so much easier in this area. Keep them closed!		
Other	I just picked my car up from the garage and once in the flow of (stand still) of traffic towards Crouch End an Ambulance with an emergency took 20 minutes to get to Crouch End due to the solid row of traffic in both dire it took	51.69290858	-0.1292715
Other	I've lived on Middle Lane for 10 years+. I like the idea of pedestrianized zones but the road closures and times just dont make any sense! The trial has been a shambles. Maybe on a Sunday this could work when there are actually people around to benefit	51.5807325	-0.114275089
Other	please consider building a monorail running from finsbury Park to Enfield. The one in Wuppertal works,	51.2716	-0.1207115
Other	I wholeheartedly support efforts to reduce traffic in the area. It is a pity that the trial is not longer as only 2 weeks will not be sufficient for people to	51.5833725	-0.123627976

	rethink their travel habits and adjust accordingly.		
Other	Added pollution, traffic gridlock, emergency services and public transport adversely affected, cut throughs in small residential streets.....	51.58321033	-0.132371978
Other	What a waste of money and time. Lived in the area and surrounding areas for over 55 years. Traffic just pushed out to other roads. Free flow of traffic more important. Why not invest in more intelligent traffic systems Let's all close down our roads.	51.58760123	-0.131858
Other	Priory road has a school, nurseries and a park on it yet it is a 30mph speed limit rather than 20mph like the rest of the area. The trial now means that there is more traffic on this road too. Priory road needs a 20mph limit. It's not safe.	51.58838862	-0.123563603
Other	Disaster Disaster. I travel from Hornsey to Camden for work by public transport every day. This trial has turned that journey into a nightmare..I dread more next week!	51.58781454	-0.126052693

Other	The changes are having a positive effect. Lots of mentions of "gridlock", but when I have see traffic on Park Lane, it's mostly large cars with only one person in them. Carpooling, walking and public transport initiatives should complement changes	51.58066804	-0.12310875
Other	Put a roundabout at the junction of Muswell Hill, Priory Road and Park Road. This is a congested and dangerous junction and this would really help traffic flow.	51.58753457	-0.119543396
Other	Allow pavement parking on Park Road between Park Avenue South and Barrington Road - you already allow it between Park Avenue South and Farrer Road. This is a wide bit of pavement on one side	51.58487474	-0.124712
Other	if you are attempting to reduce congestion. It would be sensible to add more public transport at peak times using different routes. Uber bikes and Lime bikes have been useful but coverage is patchy. Shared shuttle bikes to local stations(archway)	51.58424143	-0.129461062

Other	YOU HAVE TO KEEP THE ROADS CLOSED FOR LONGER. Of course it's going to create an uproar, it IS a disruption, roads ARE going to see an influx in traffic/ pollution in the short term. This is all necessary to provoke people to think about their drives.	51.57848121	-0.121229
Other	Can't help but feel the increased traffic/traffic pollution on Priory Road and Hornsey High street is the best idea with one playground, two school and four nurseries within a stone's throw of the road.	51.58751843	-0.12565575
Other	Please consider changing around the traffic flow where Tottenham Lane and Church Lane meet, so the traffic goes down the hill on Tott Lane, and up the hill on Church Lane.	51.585873	-0.12585375
Other	the trial scheme has been a disaster - it should not become permanent - it has created traffic jams in several locations	51.57953987	-0.119143323
Other	Pros and Cons for The W3 to Finsbury Park - route is much swifter without cars failing to give way, but service itself is more erratic due to congestion.	51.5857347	-0.131732

Other	Although there was traffic congestion to start with, it seems to me that Crouch End is now quieter than before. I've certainly decided not to use the car for a couple of tasks. It needs a longer trial, two weeks not long enough for people to adapt..	51.57996133	-0.128170297
Other	Traffic levels and speed are still far too high on Ferme Park Road given the residential nature of the area	51.57623328	-0.116439656
Other	Crossing the road from the top of Park Rd where it turns into Tottenham Lane has become more dangerous as there is far more traffic turning here and you cannot see it approaching round the bend.	51.57993466	-0.123906831
Other	I was really excited about this and kept waiting to believe the traffic wasn't as bad as people were saying, that the terrible start with roadworks on 1st day was the problem but the traffic was awful. And needs right turn up Coleridge Rd or somewhere.	51.581571	-0.127411008
