

I wish to endorse the submission made by the Pinkham Way Alliance on behalf of the residents and businesses that would be affected by the construction of a waste processing plant on Pinkham Way.

I have submitted my personal views on several occasions, expressing my extreme concern with the environmental impact of this proposal (noise, waste, pollution) and also with the negative affect that it would have on local traffic on the already congested North Circular Road.

The Alliance has set out our views cogently and with authority and I fully support their statement on our behalf.

Your faithfully,
M. A. Arnott
