

Religion

The most up-to-date figures on the religious profile of Haringey residents come from the 2001 Census. In 2001, half of Haringey's residents were Christian, compared with 58.2% of London's and 71.7% of the residents of England Wales. 11.3% of Haringey residents stated their religion as Muslim, compared with 8.5% of London and 3.0% of England and Wales. Haringey has a lower percentage of residents who stated their religion as Hindu (2.1%) and Sikh(0.3%) than has London (4.1% and 1.5%, respectively). A fifth of Haringey residents stated that they did not have a religion, which was higher than for London (15.8%) and for England and Wales (14.8%).

Table 12: Religious beliefs, 2001

	Haringey %	London %	England and Wales %
Buddhist	1.1	0.8	0.3
Christian	50.1	58.2	71.7
Hindu	2.1	4.1	1.1
Jewish	2.6	2.1	0.5
Muslim	11.3	8.5	3.0
Sikh	0.3	1.5	0.6
Other religion	0.5	0.5	0.3
No religion	20.0	15.8	14.8
Religion not stated	12.1	8.7	7.7

Source: Census 2001

Table 13 shows Haringey to be one of the religiously most diverse places in the UK. Haringey ranks 12th nationally with a Simpson's score of 3.133. Other London boroughs in the top 20 include Barnet (2nd), Hackney (5th) and Waltham Forest (17th). Leicester ranks 1st.

Table 14 shows religious distribution by ward level. Seven Sisters has the lowest percentage of Christian residents (44.3%) and White Hart Lane the highest (56.9%). The lowest percentage of Muslim residents is in Muswell Hill (2.91%) and the highest is in West Green (16.3%) and Tottenham Hale (16.7%). The highest percentage of Jewish residents is in Seven Sisters (10.25%), Fortis Green (8.69%) and Highgate (8.15%). The area with the largest percentage of residents stating they had no religion was Stroud Green (32.7%) with the lowest in Northumberland Park (10.3%).

Social grade

'Social grade', widely used by market research and marketing industries, is a measure of income and employment status (see box in chart 13, for more detail). Haringey's 2001 Census shows a distinct polarisation, in terms of social grade, between the east and the west of the borough, with high concentrations of grades D and E in the east of the borough, and AB and C1 in the west.

Chart 13: Social Grade in Haringey by ward

Source: 2001 Census, ONS

Household composition

According to the 2001 Census, 29.2% of Haringey's households had dependent children, which is in line with London (29%). As table 15 shows, 13.6% of all households were lone parent households with either dependent 'or non-dependent children, which was higher than in London (11.1%). The proportion of single person households was 35.8%, slightly higher than London (34.7%). The proportion of married couple households (27.2%) was below London as a whole (34%).

Table 16 shows the distribution of households at ward level. The proportion of lone parent households with dependent children is highest in White Hart Lane (17.8%), Northumberland Park (15.5%) and Tottenham Hale (15.5%), and lowest in Crouch End (4.2%), Highgate (4.4%) and Muswell Hill (4.4%) - this is illustrated further in map 8. The areas with the highest proportion of couples with dependent children are Alexandra (22.6%) and Muswell Hill (20%); and the areas with the lowest proportions are Highgate (11.6%) and Haringgay (11.8%).

Source: 2001 Census, ONS

GLA household projections are shown in chart 14. These indicate that by 2026 the projected growth will be for one person households (+40%), lone parent households (+45%) and cohabiting couples (+118%). Married couple households will fall by 34%. So by 2026 it is projected that one person households will account for over 40% of all households and that the others will each account for between approximately 14 % and 17% of households. These trends will inevitably have implications for services, including housing and family services, required in the borough.

Chart 14: Projected household composition in Haringey, 2001-2026

Housing

We want people to have greater opportunity to make a success of their lives and to benefit from the borough's prosperity. This means in part that we need to increase the availability of high quality affordable dwellings through the optimum use of existing dwellings and by building more affordable homes, and that we need to improve our stock to Decent Homes standard.

Tenure

The number of households living in the borough has increased from 85,300 (1991 Census) to 92,170 (2001 Census). Of these households:

- 44.6% are owner occupiers compared with 55.6% in London and 68.22% in England and Wales (49.7 % in 1991 census);
- 20.1% are renting privately (19 % in 1991 census);
- 19.7% are council tenants (24.9% in 1991 census); and
- 10.5% are RSL tenants (6.4 % in 1991 census).

Table 17: Tenure of Dwellings in Haringey, 2001

	Haringey	%	London	%	England and Wales	%

Source: Census 2001

Private rented

In 2001, there was a larger than average number of households living in private rented accommodation in Haringey. 20.1% of Haringey households live in private rented accommodation compared with 14.3% in London and 8.72% in England and Wales.

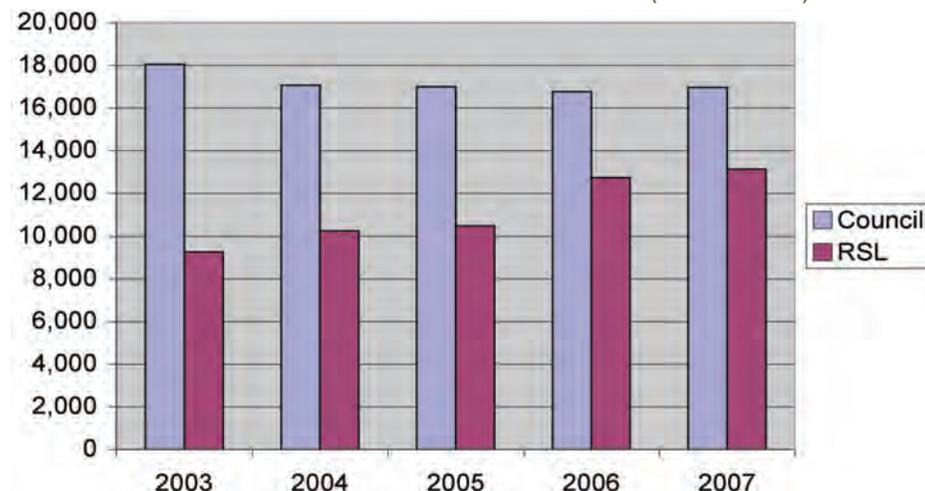

Social rented stock

Chart 15 shows that there has been an increase in the number of RSL properties and a decrease in the number of Council rented properties. The reductions recorded in Council stock numbers between 2003 and 2005 are largely due to Right-to-Buy sales. Overall, there has been a net increase of 164 properties from Haringey Borough's social housing stock (82 per annum).

Homes for Haringey is Haringey's Arms Length Management ALMO that was established in April 2006. Homes for Haringey manages the running of council housing, whilst the council remains the landlord.

Map 9 shows the distribution of social housing in the borough. The highest concentrations are in White Hart Lane and Noel Park.

0 to 7.7	(37)

Housing and ethnicity

Chart 16 shows ethnic group and tenure. The data shows that 'Black and Black British' households are more likely than other groups to be living in social rented housing. White - Other households are particularly likely to live in the private rented sector. 'White - British' and 'Asian and Asian British' households are most likely to be owner-occupier.

Chart 16: Tenure by Ethnicity 2005

(Source: Haringey Housing Needs Survey)

Affordable housing need

The average home in Haringey costs £327,804. Private renting costs vary but the average rent for a 3-bedroom house is about £290 per week. The £27,368, average gross household income in Haringey is lower than the London average of £28,772. These figures illustrate that for a high proportion of Haringey households the only affordable housing is in the social or other affordable housing or the cheaper parts of the private rented sector.

Haringey’s adopted Unitary Development Plan (2006) defines affordable housing as:

“Housing which is attainable to buy/rent for those people whose incomes are insufficient to allow them to afford to buy/rent locally on the open market. Affordable housing comprises social housing, intermediate housing and in some cases, low cost market housing”.

Average incomes

Average earnings amongst Haringey residents have grown steadily in recent years and has remained higher than England averages – though living costs in London are, of course, higher than in the rest of the country. At 2007, the average gross weekly earning of full-time workers in Haringey was £526.30 compared with £524.90 in 2006 and £448.30 in 2002.

House prices and rent levels

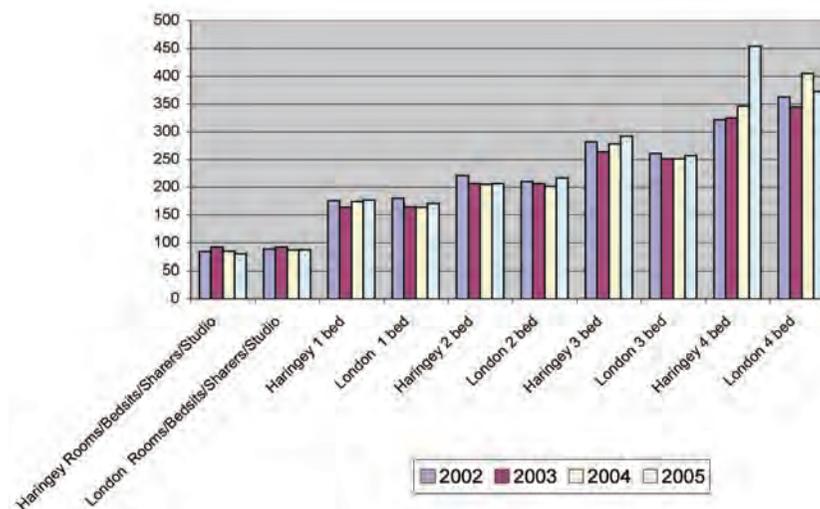

Between 2002-2007, there has been a significant increase in average house prices, rising 94.9% over this period, in line with a Greater London increase of 93.1%. This puts house price increase in Haringey above that of neighbouring boroughs, Islington, Enfield, and Barnet. The average substantive house price in the borough is now £328,804, which is only marginally lower than the London average of £338,950.

Table 18: Average house price and price increase 2007

Borough	Average house price 2007 (£)	Average price increase 2002-07 (%)
Haringey	327,804	94.9
Enfield	254,938	87.7
Islington	406,237	85.7
Barnet	337,713	86.9
Hackney	334,811	102.4
Greater London	338,950	93.1
England and Wales	181,039	116.0

(Source: Land Registry 2007)

Chart 17: Average rent per week in Haringey and Outer London 2002-2005

(Source: GLA Private Sector Rents Bulletin 2002-2005)

Between 2002-2005, the average rent per week in Haringey has remained stable across all property sizes, with the exception of 4 bed houses, which has seen a significant increase between 2004-2005 of over £100 per week. In comparison with London, Haringey's average rent per week for 3 and 4 bedroom properties is higher, demonstrating the need for larger affordable housing properties.

Shortfall in the availability of social housing

The Housing Needs Survey 2005 calculated that there is a social housing shortfall of 4, 865 units per year.

Table 19: Net need for affordable housing by size () indicates a surplus

Size required	Need	Supply	Housing shortfall	Supply as % of need
1 bedroom	1,221	465	756	38.1
2 bedroom	2,391	359	2,032	15.0
3 bedroom	1,704	155	1,550	9.1
4+ bedroom	567	40	527	7.1
Total	5,884	1,019	4,865	17.3

Source: Housing Needs Survey 2005

Housing supply

Housing development

The Mayor's London Plan seeks a 50% contribution from housing developments towards the provision of affordable homes for those who cannot afford to buy in the open market.

Haringey's Unitary Development Plan 2006 states that developments capable of providing 10 or more units will be required to include a proportion of affordable housing to meet an overall borough target of 50%.

Affordable housing- supply

In 2006-07, 1067 net additional dwellings were completed, comprising 64% new builds (681 dwellings), 31% conversions and extensions (333 dwellings) and 5% change of use (53 dwellings); 312 affordable housing units were completed which represents 46% of all housing completions. Of these affordable housing completions 75% were social rented units and 25% were intermediate.

Our projected net additional dwellings up to 2016 is set out in Table 20.

Table 20: Projected net additional dwellings up to 2016

Year	Net additional dwellings)
2007/08	1027
2008/09	1657
2009/10	1602
2010/11	1195
2011/12	855
2012/13	495
2013/14	517
2014/15	395
2015/16	195

(Source: Haringey's Annual Monitoring Report)

Table 20 shows the projected net additional dwellings for Haringey with half of these projected dwellings being affordable units.

Regeneration

The Council's approach to regeneration is to make the borough a place where people want to live, work and visit by actively promoting sustainable regeneration, including economic, social and environmental improvements. A well designed and maintained environment increases well-being and the sense of pride that people have in their area.

Outlined below are some of the key regeneration projects taking place in the Borough.

Tottenham and Haringey Heartlands

are key development areas in the London-Stansted-Cambridge-Peterborough growth area.

This will ensure that Tottenham has a strong sense of identity and a vibrant mix of community, commercial, leisure and residential uses. In the next 15 years the new Tottenham will be characterised by, amongst other things:

- a new urban centre with a high quality station square,
- a new station interchange with international transport connections,
- a green link/linear park that acts as a spine connecting existing and new communities,
- a new primary school and health centre,
- a series of distinct urban quarters providing over 5000 new homes.

A new masterplan to transform Tottenham Hale into a thriving residential and retail area has been adopted. The Tottenham Hale Urban Centre Masterplan outlines proposals for 2,500 new homes, new employment opportunities and major improvements to six sites in one of Haringey's key regeneration areas.

Haringey Heartlands will be a new mixed use urban quarter that draws its sense

of place from its unique industrial heritage and its relationship with established neighbourhoods. It will be characterised by:

- a thriving cultural and enterprise cluster,
- a new landmark square at the centre of the area,
- a series of streets that radiate out from the central square, connecting the area with surrounding neighbourhoods and Wood Green town centre,
- a new secondary school and health centre,
- a rich and varied mix of over 3000 new homes.

The Bridge – new deal for communities

aims to improve the quality of life for residents. We will work to make the area thrive economically, flourish socially, and regenerate it for current and future residents. The programme will enable the development of key sites of strategic importance in the Seven Sisters area such as Wards Corner, St Ann's Bridge and 341-379 Seven Sisters Road.

Tottenham High Road regeneration corridor

Our new intensive development will focus on the core town centres along the high road- Seven Sisters, Bruce Grove and Northumberland Park. By focusing our redevelopment on strategic sites, we will ensure maximum regeneration in the area, including:

- the expansion and redevelopment of the Tottenham Hotspur Football Club,
- the redevelopment of Wards Corner as a landmark mixed use development,
- the redevelopment of the Former Tottenham Baths and Clyde Road Depot for a mixed use development, and
- the retaining and repairing of Scotland Green for retail and residential use.

Upper Lea Valley

Haringey is working in partnership with Enfield on the Upper Lea Valley industrial estates improvement programme which will develop five industrial estates:

1. Harbet Road - Intermodal Transport
2. Claverings Industrial Estate - Flexible Workspace for Small Medium Enterprises (SMEs)
3. Mid Brimsdown Development - Small Scale Access Scheme
4. Montagu Industrial Estate - Capital Facilities for Training
5. Rangemoor Industrial Estate - Flexible Second Stage Workspace for SMEs

The programme is a strategic area regeneration package addressing the needs of industrial estates, vacant properties and reclaimed land in need of development.

The Wood Green Masterplan

The Wood Green Masterplan will make Wood Green a top-quality shopping centre and an attractive place to live and work. We need thriving businesses creating jobs, but we are also determined to create an environment that residents, businesses and visitors can enjoy.

Parks, sport, leisure, libraries and culture

Haringey is endowed with a wide range of parks, sports facilities, libraries and leisure and cultural services. These are highly valued by our residents and help contribute to the borough's prosperity, happiness and well being.

Parks and green spaces

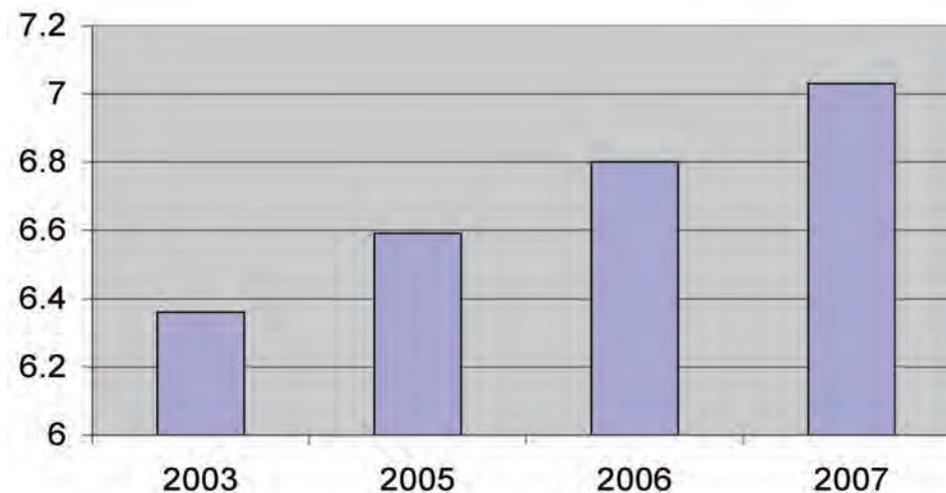

Haringey has 1.7 hectares of open space per 1,000 of the population; 27% of the land area of Haringey is green spaces and areas of water.

We have 36 Historic Parks and Gardens, two of which are on the National Register of Parks and Gardens of Historic Interest - Alexandra Park and Finsbury Park. The remainder are on the Register of Public Parks, Gardens, Squares, Cemeteries and Churchyards of Local Historic Interest.

Eight parks have achieved Green Flag status putting Haringey equal with Westminster as the London borough with the most Green Flags. These parks are Albert Road Recreation Ground, Bruce Castle Park, Chapmans Green, Downhills Park, Priory Park, Stationers Park and Railway Fields Local Nature Reserve.

Park use satisfaction has been increasing since 2003, with over 70% of residents satisfied with our parks.

Chart 18: Haringey Park Use Satisfaction Survey 2003-2007

(Source Haringey Satisfaction Survey 2007)

Haringey contains 1,658 hectares of land designated as Ecologically Valuable Sites. Since 1998 the Council has designated seven Green Corridors across the borough.

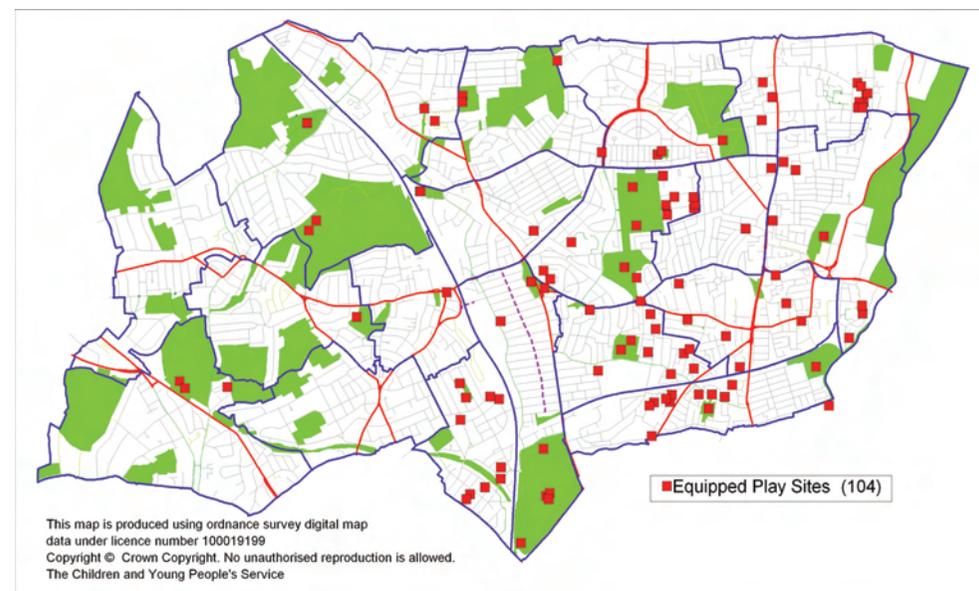

Allotments

Haringey manages over 26 allotment sites covering just over 76 acres of land, with over 1600 people leasing the allotment plots. Currently there is provision for an additional 179 allotment holders within the borough from vacant plots. It is estimated that by 2016 we will need an additional 1156 plots to meet increasing demand.

Designated play areas

Not including the many school playgrounds scattered around Haringey, there are 65 local authority-run play areas located within public parks and two adventure playgrounds, including the innovative Lordship Recreation Area adventure playground.

Map 10: shows the 104 equipped play sites across the borough; these range from large equipped, to small equipped to a swing or a roundabout in an estate. The preponderance of these sites are in the east of the borough—most notably St Ann's, Seven Sisters and West Green.

Sport

Appropriately developed and managed sport facilities make an important contribution to wider outcomes such as supporting healthier and stronger communities, raising standards of educational attainment and an overall sense of community and civic pride.

Haringey Council operates four sports and leisure facilities:

- Finsbury Park- track and gym
- Park Road- leisure centre
- Tottenham Green- leisure centre
- White Hart Lane- community sports centre

There are six public swimming pools on two sites- Tottenham Green and Park Road.

There are 15 facilities with large sports halls operated through the main leisure facilities and at secondary school sites. There are five further smaller halls within the borough mainly located at other sports facilities, five halls which form part of community centres and a further 69 halls located at other school sites within the borough.

There are a total of 46 full size football pitches, 23 cricket pitches, two rugby pitches and two hockey pitches across the borough. There is also provision for junior leagues with 19 junior (6-a-side) football pitches, 36 5-a-side pitches and two junior cricket pitches.

There are two outdoor athletics facilities at White Hart Lane Community Sports Centre and Finsbury Park Athletics Track. There are 160 tennis courts, 10 bowls rinks, 15 netball courts and 31 basketball courts and practice areas.

There are three full size Astro Turf Pitches (ATPs) currently in use, all of which are floodlit.

Some 21% of pitch sites are owned and managed by the voluntary sector within Haringey, compared with 6% for London as a whole. The higher than average

level of voluntary sector management is a distinctive feature of pitch provision within Haringey.

In terms of outdoor sports provision, there was a total of 119 clubs identified as operating across the borough, including 84 football clubs, 29 cricket clubs and individual clubs who play rugby union, rugby league, Australian rules football and camogie. Within these clubs there are an estimated 6,793 members who play on a regular basis (defined as playing at least once every four weeks). In addition there are an estimated 1,800 club members who play on a casual basis (defined as at least once a year).

An estimated 28% of football clubs, 30% of cricket clubs and 20% of hockey clubs draw more than half of their members from outside the borough.

Around a third of the borough (in terms of area) is not located within walking distance of any playing field currently managed for pitch sports (including casual pitches). Around half of the borough is beyond walking distance from a site actively managed for outdoor pitch sports.

Libraries

There are nine libraries in Haringey. We also operate a mobile library and a 'housebound' library service.

During 2006-2007, there were 2,151,311 visits made to Haringey's libraries. Visits have increased by almost two and a half times since 2001-2002, although there has been a 2.6% decrease since 2005-2006. Wood Green Central library has consistently had the most visits since 2001-2002. Visits have increased across all our libraries, but the greatest percentage increases have been seen in Coombes Croft, on Tottenham High Road, which has seen more than a six-fold increase in visitors, and Highgate, which has seen almost a five-fold increase.

(Source: Haringey Council)

Our libraries issued 1,256,954 items in 2007-2008, which is an increase of 43% since 2000-2001, but a 5.6% reduction down from the peak in 2006-2007. Since 2000-2001, the most issues have consistently been for children's books, although the greatest percentage increase between 2000/01-2007/08 has been in audio-visuals.

Arts and culture

There is a wide range of cultural and arts opportunities and venues in Haringey:

- **Alexandra Palace** was built as a Victorian environment and recreation centre. It now boasts facilities for recreation, exhibitions, conferences, hospitality and private celebrations. Alexandra Gallery is located in the Palace Garden Centre.
- **The Chocolate Factory 1 & 2** are former home of Barratts Confectionery that has been converted into studio spaces for artists and creative industry businesses. The Chocolate Factory 2 has a Creative Online Centre, a 150-seat multipurpose Karamel Club for performance poetry, jazz, and exhibitions and the Mosaica restaurant. The two buildings together with the Mountview Academy of Theatre Arts are the largest creative business cluster in North London, and one of the biggest in London.
- **Bernie Grant Arts Centre** includes a state of the art performance space and provides performing arts and new media training for the community and career development programmes for practitioners, and workspaces for creative businesses.
- **Bruce Castle Museum** cares for Haringey's unique cultural heritage and promotes the understanding and enjoyment of that heritage through access and education for all.
- **Black History Month** is a major annual event, celebrating the culture and achievements of the borough's Black communities with activities ranging from celebrity events to exhibitions, music, seminars, poetry, dance and workshops for families and children.
- **Tottenham Carnival and Festival**, music festival celebrating the cultural diversity of North London.
- **Wood Green Film Festival** show cases innovative short films of 5-10 minutes created by both local and international short film makers.
- **Wood Green and Hornsey Libraries and Bruce Castle Galleries.** These Galleries host a variety of exhibitions and events, including the successful annual **Haringey Literature Festival**
- **Collage Arts** (formerly Haringey Arts Council) is a leading arts development,

training and creative regeneration organisation based in Haringey's Cultural Quarter.

- **The Tagore Centre** is a substantial lending library consisting of books, journals, photographs, CDs and videos of Tagore and his work, and also organises theatre productions, dance performances and visual arts exhibitions.
- **Mountview Academy of Theatre Arts** was founded in 1945, and is now recognised as one of the country's leading Academies of Theatre Arts, offering an extensive and stimulating training for those interested in pursuing a performance, directing or technical theatre career.
- **Jackson's Lane Arts Centre and Theatre** showcases circus, comedy, dance, drama and music performances and also runs a huge variety of arts courses for all parts of the community.
- a wide selection of restaurants, cafes, theatres, galleries and music venues.

Access to transport

Much of Haringey, including some of its deprived neighbourhoods, has relatively good public transport. This means that employment opportunities in the City and West End are fairly easily accessible, as are the opportunities of the London-Cambridge corridor and Stansted Airport. In common with many London boroughs, Haringey suffers the effects of large amounts of through road traffic. Nevertheless, we need improved transport between Haringey's different neighbourhoods and better services and connections with other parts of London, as this will increase mixing and cohesion, boost economic outcomes by improving access to jobs and commerce, and will reduce traffic congestion.

National Rail services run mostly North to South. Local services on the Lea Valley Line serving Tottenham Hale and Northumberland Park are constrained by lack of capacity on the route. Improvement of these services are a major aspiration for the borough. There are limited cross-borough transport links between east and west. There is also a need for better links to Stratford and between Tottenham and the growth areas of Docklands and Thames Gateway.

Muswell Hill Broadway provides important bus to bus interchange in an area poorly served by Underground and National Rail services. Finsbury Park station, although lying outside the borough boundary, has a substantial catchment area within Haringey and is of considerable importance as an interchange.

The Piccadilly Line of London Underground serves Turnpike Lane, Wood Green and Bounds Green. The Northern Line serves Highgate while Tottenham Hale and Seven Sisters are on the Victoria Line. Statistics from London Underground show that substantial overcrowding occurs on Underground lines in the borough during the morning peak. This occurs particularly at Seven Sisters on the Victoria Line and Turnpike Lane on the Piccadilly Line. The Council are supporting enhancements to existing transport services and new infrastructure to support the Council's, the Mayor's and the Government's growth agenda.

The borough is served by 40 bus routes, of which all but seven are high frequency routes and are mainly cross-borough in nature.

Car ownership

The 2001 Census shows that 46% of households in Haringey do not have access to a car, compared with 37% of households in London. Map 11 shows that car ownership is higher in the west of the borough. As is to be expected, car ownership is lower in the poorer east of the borough. However, it must also be noted that there are more tube and train stations in the east which may reduce the need for car ownership.

Map 11: Car ownership in Haringey (2001)

Percentage of population who own at least one car or van
