

Dear Sirs,

It is enormously important to ensure the Pinkham Way site is recognised and protected as a conservation area. This site has developed naturally over many years, and we must protect this natural habitat and its wildlife.

Please also bear in mind that it is especially important to conserve the green lungs of this area, as the massive volumes of traffic in this area are bringing our air quality to dangerous levels. This is especially hazardous to children and animals, as their smaller size means they breathe the traffic fumes which accumulate near the ground, so exposing them to increased health risks.

I support the modification to SP8 made by the Inspector. However, it would be helpful if your report reflected the evidence given at the hearing by the Council, that the Pinkham Way site is not an established industrial site. I believe a statement to this effect would remove ambiguity as to the status of this Employment Land site.

I would welcome a statement in your report that the site is open space and that it is not brownfield/previously developed land because it is excluded from this definition under the London Plan and the NPPF definitions of previously developed land. Evidence was produced to support that at the inquiry which was not disputed by the Council.

I consider that the protection of the SINC status of the Pinkham Way site has been weakened. In the UDP it stated that development would be allowed on the site **provided there was no impact on the nature conservation value of the site.** This direct proviso has been delinked in the new strategy and reworded.

I would like to see unambiguous protection of SINCS within the Biodiversity Policy (rather than in the narrative to this policy). For example, in the policy box, after the statement "All development shall protect and improve sites of biodiversity and nature conservation etc, add a fourth bullet point to the effect:

- "The Council will not permit development on SINCS and LNRs unless there are exceptional circumstances and where the importance of any development coming forward outweighs the nature conservation value of the site."

The rest of the modification, ie "in such circumstances" etc to remain in 6.3.23 as narrative.

I would like to suggest one further minor amendment to paragraph 6.3.23 – that the last sentence reads "SINCS within the borough include Bluebell Wood, Muswell Hill Golf Course, Former Friern Barnet Sewage Works (Pinkham Way), Hollickwood Park, Tottenham Cemetery and Bruce Castle Park." I suggest this because these first four SINCS are directly geographically linked to each other and it would be appropriate to mention them together. Dropping any one of them seems inappropriate.

Proposal Maps 7, 16 and 24 need changing to reflect your decision not to permit the redesignation to LSIS.

Yours faithfully,

Fiona Brickwood
