

Dear Sir/Madam,

I am responding to the consultation on the inspector's Main Modifications (REF PE-28). I am a local resident and have lived in the area for a few years. We moved to the area because it is so green and so family orientated. Our children go to the local school. I have been following the NWLA proposal to build a waste facility on the Pinkham Way site. It seems to me totally inappropriate for this area. I am particularly worried about the attempt to re-classify the land. Sure huge waste facilities should be built on land designated for this type of use. I feel very strongly that areas of green land in London (a city which is increasingly polluted) should be maintained as green land and should not be built on.

I support the modification to SP8 made by the Inspector. However, it would be helpful if your report reflected the evidence given at the hearing by the Council, that the Pinkham Way site is not an established industrial site. I believe a statement to this effect would remove ambiguity as to the status of this Employment Land site.

I would welcome a statement in your report that the site is open space and that it is not brownfield/previously developed land because it is excluded from this definition under the London Plan and the NPPF definitions of previously developed land. Evidence was produced to support that at the inquiry which was not disputed by the Council.

I consider that the protection of the SINC status of the Pinkham Way site has been weakened. In the UDP it stated that development would be allowed on the site provided there was no impact on the nature conservation value of the site. This direct proviso has been delinked in the new strategy and reworded.

I would like to see unambiguous protection of SINCS within the Biodiversity Policy (rather than in the narrative to this policy). For example, in the policy box, after the statement "All development shall protect and improve sites of biodiversity and nature conservation etc, add a fourth bullet point to the effect:

- 

"The Council will not permit development on SINCS and LNRs unless there are exceptional circumstances and where the importance of any development coming forward outweighs the nature conservation value of the site."

The rest of the modification, ie "in such circumstances" etc to remain in 6.3.23 as narrative.

I would like to suggest one further minor amendment to paragraph 6.3.23 – that the last sentence reads "SINCS within the borough include Bluebell Wood, Muswell Hill Golf Course, Former Friern Barnet Sewage Works (Pinkham Way), Hollickwood Park, Tottenham Cemetery and Bruce Castle Park." I suggest this because these first four SINCS are directly

geographically linked to each other and it would be appropriate to mention them together. Dropping any one of them seems inappropriate.

Proposal Maps 7, 16 and 24 need changing to reflect your decision not to permit the redesignation to LSIS.

Best wishes,

Belinda Lawley
