wireless

means more freedom

How do I use wireless internet @ Haringey Libraries?

Step 1 What you need

You will need a laptop that can connect to a wireless network. Other WiFi capable devices such as PDAs and iPhones are also supported.

Step 2 Get connected

Ensure that you have connected to the appropriate WiFi network (for instance, "WoodGreenLibrary" or "HornseyLibrary"). This is an unsecured signal.

Step 3 Launch browser

Launch your browser and you will be automatically directed to the WiFi home page. If this does not happen, try typing a web address in the address bar.

Step 4 Log in

If you already have an account, input your username and password. New users should follow the link "Free Registration" and fill in the online form, where you can create a username and password.
Happy browsing!

Troubleshooting

An information sheet is available at the reception desk, which gives further instructions on how to configure your wireless network, answers common problems and provides a telephone helpline.
