## Works Notice

### Princess Avenue N10: Proposed Electric Vehicle (EV) Recharging Points

Dear Resident or Business,

As you may be aware we consulted residents and businesses in September 2011 over the possible introduction of Electric Vehicle charging points in Princess Avenue, N10.

Following feedback received as part of the statutory notification process I am now writing to thank all those who commented on the proposals and to inform you that details of feedback can be found in the Council's report which is available on our website under Environment & Transport > Parking > Parking consultations > recent parking consultations.

The Council has now decided to introduce the charging points and full details are attached. Implementation work will be carried out from the week commencing **23 January 2012** and anticipated to be completed by **29 February 2012**, the time frame of approximately 6 weeks is due to the involvement of different contractors commissioned to introduce these charging points. Legal notices will be published on **20 January 2012** and copies displayed in Princess Avenue. The scheme will come into effect once all the installation works are completed on site.

If you require any further information on these works or the overall scheme, please contact our Project Engineer Bethlehem Girma for the scheme on 0208 489 1763 or via email at: [Frontline.consultation@haringey.gov.uk](mailto:Frontline.consultation@haringey.gov.uk)

Please note that electric vehicles are only permitted to be in the charging bays providing continuous recharging is actually taking place. If Electric vehicles are parked in these bays without charging or any other type of vehicle is parked within the designated bays, they will be considered to be in contravention of the restrictions that apply to these bays and it is likely they will be issued a Penalty Charge Notice (PCN).

Thank you for your attention.

Yours faithfully,

**Ann Cunningham**  
Head of Traffic Management
