**Subject:** Wood Green AAP

Sirs,

I am pleased to note that the published AAP recognises the need to keep Wood Green bus garage operational.

On page 64, you raise the issue of optimal entry and egress routes for the garage, and we look forward to discussing this with you.

Also on page 64, any change to bus standing facilities is a matter for Transport for London but, as the major operator locally, we would welcome an opportunity to be involved.

We would also welcome an early involvement in discussions over managing traffic flows through the period of construction work through Wood Green.

Regards

Bob
