Dear Haringey Cabinet Members,
Re the Proposed Pinkham Way
Waste Plant.

1/10/11
I am very concerned regarding the Pinkham Way Wood being transformed seemingly overnight to a designated industrial site.

~~There has been no publicity regarding this particular planning application. However, I now hear that this decision has been reconsidered. Even so, I would like to know if, at the time, if there was a full Council meeting debating this? Will you please advise me of full details and dates? I would be grateful to have the actual facts in order to clarify the situation as I am not on the internet.~~

My other concern is WHAT the council are doing whilst the

PTO

2/19/95
situation due to public demand and demonstration, is being put "on hold"? Again, I understand that the NLWA are continuing with their plan to use this site for the proposed MBT plant. I only hear silence from Haringey Council. Again, would you be so kind as to inform me on what is happening within the Council? As

lack of activity can be seen as agreement.

3/19/95
May I respectfully remind the Council that they are elected in good faith by us the public, to work honestly and with care for the benefit of us all to live in a safe and healthy environment. I believe to destroy this ecologically rich woodland on Pinkham Way would be a tragedy. Green environment should be treasured and preserved.

Thank you for reading this letter and I would be grateful for a reply.

Yours faithfully
RNB Stout
