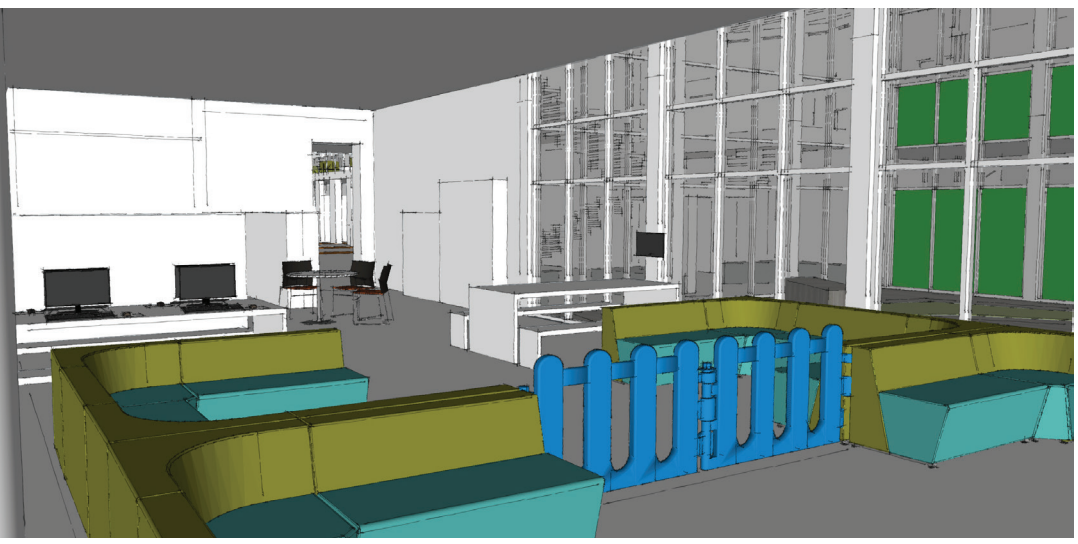
Hornsey Library
PROJECT BULLETIN



Background/Overview

During the next 18 months, Hornsey Library will undergo a makeover, which will include a bright new library space and more modern facilities as part of an improvement project that will see more than £1milllion invested in the building.

The Grade II listed building will see internal improvements including new furniture and IT equipment, an improved children's library section and a refurbished main entrance and main library. We will also be developing and understanding the maintenance requirements for the building.

While delivering more modern facilities, the work will respect the architectural character and history of the original library, with minimum impact on the structure of the building. There are no plans for any new services to be introduced.

Latest News

The Hornsey Library Project is moving forward. In the next couple of months we will be:

- Sharing the feedback already received from the public display in the library with the design team
- Carrying out further evaluation into the condition of the building including heating, lighting, roofs etc.
- Using this information to develop the design in more detail, including the approach to the works and how to best maintain the library service during the works
- Sharing more detailed proposals and inviting further input

We'll be posting regular updates at the library and on our website at **www.haringey.gov.uk/hornseylibrary**

In the meantime, we have produced some Frequently Asked Questions based on the feedback we have received to date.
