Here goes with some predictions.....

7. Simulation Engineer

There is a simulator for nearly everything these days, from surgeries to flying to drinking and driving. As this increases as it is expected to do, specific engineers and technicians will be required

8. Social Media Manager

Facebook, Twitter, LinkedIn – Just a few of the social media platforms available. Organisations are now employing social media managers to oversee their online presence and protect their brand

Here goes with some predictions.....

9. Stem Cell Scientist / Researcher

A controversial topic maybe but research is gaining ground. Scientists and Researchers will be needed to develop cures, genetic enhancements and develop its huge potential

10. Sustainability Officer

Sustainability is a major concern for organisations and the world as a whole, we are seeing the hiring of eco-savvy individuals who can research, find and implement eco-friendly solutions and policies to benefit the organisation

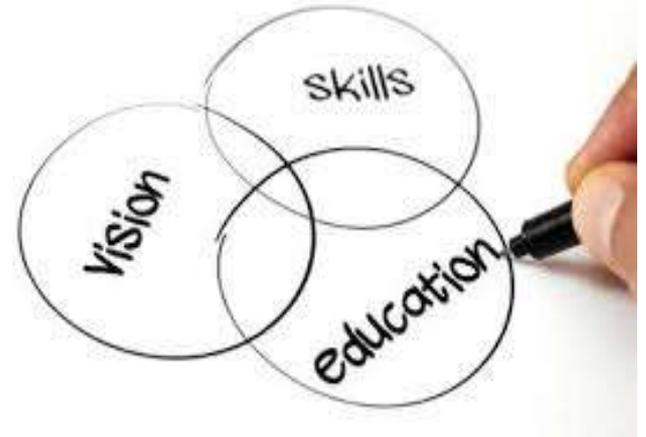

So, how do we prepare for a future we are not sure of?

- The key is around developing the skills and attitudes for success – you can always learn specific job skills

What skills will be needed?

- Critical thinking
- Initiative and entrepreneurship
- Effective written and spoken communication
- Ability to access and analyse information

What attitudes will make you successful?

- Agility and adaptability
- Curiosity and imagination
- Ability to get on with people
- Hard work ethic and perseverance
- Commitment to continuing to develop your skills and knowledge

Conclusion

- No one has a crystal ball, but we can prepare for change by being adaptable and by gaining the skills that help us keep up with developments and technological change
