

Outcome 2

Green

Percentage of people rough sleeping who have access to appropriate support to exit street homelessness

Haringey's rough sleeping figures come from the Combined Homelessness and Information Network (CHAIN), a multi-agency database recording information about rough sleepers and the wider street population in London. Due to the ongoing COVID-19 pandemic the CHAIN reports have been delayed, therefore we will not be able to provide any updates for Q4 at this time. Until then this indicator will maintain its green status from Q3.
