

**Outcome7**

Proportion of adult safeguarding cases with risks removed or reduced at end of case

**Red**

Target: 95% removed or reduced, with an increased proportion removed

In Haringey 91% of the safeguarding cases concluded had their risks either removed or reduced in Q1 of 2021/22. This was 4% below the target but still higher than the national average, our statistical neighbours, and London based on the latest available published data. On this basis this measure has been rated amber/green in terms of progress.
