

<b>Outcome 7</b>
No Data

Total non-elective admissions into hospital for all ages per 100,000 population

Target: 1.9% reduction on 2018/19 actual position

The non-elective admissions metric is being replaced by a metric on avoidable admissions. This reflects better the focus on joint health and social care work to support people to live independently in their own home and prevent avoidable stays in hospital. Further details will be available in Q3.
