

# Working together

## YOU SAID...

### Issues raised by residents, traders, shoppers and visitors included:

- ➔ Anti-Social Behaviour and Crime
- ➔ Cleanliness and fly tipping
- ➔ Parking and congestion
- ➔ Condition of roads and pavements
- ➔ Drainage
- ➔ Lighting
- ➔ Physical Environment
- ➔ Lack of greenery and trees

## WASTE

- ☒ Fly tipping in this area is typically black bags presented on the pavement at the wrong time of day
- ☒ The area has two collections each day, one in the morning and one in the evening.
- ☒ Businesses have separate commercial contracts for disposal of waste and where this is via a sack collection it should also keep to the advertised time bands
- ☒ The council will check that businesses have arrangements in place for collection of waste
- ☒ Council officers try to prevent fly-tipping by offering advice and guidance, designing out opportunities where possible and enforcing where they are able

## ANTISOCIAL BEHAVIOUR AND CRIME

- ☒ Partnership working with the Metropolitan Police to identify the offenders involved in drugs activity at Duckett's Common
- ☒ Police and council increased resources to tackle anti-social behaviour in the area and share intelligence
- ☒ Haringey Council Officers are exploring possible sources of funding to install a CCTV camera to cover Harringay Passage

## DIRTINESS / STREET CLEANING

### Litter

- ☒ Turnpike Lane is swept throughout the day from 7am. Feedback on the quality of the sweep is good
- ☒ The Council has purchased a new deep wash kit and will be carrying out extra cleaning of the pavements

### Graffiti

- ☒ The council will remove graffiti, and within 24 hours if offensive or racist. There may be delays if the graffiti is on private property

## FESTIVE LIGHTS

- ☒ Haringey Council will install power supply and sockets to support installation of Festive lights, to be ready for Christmas 2019

## WE ARE...

## CONDITION OF THE ROADS AND PAVEMENTS

- ☒ The council will resurface the rest of the Turnpike Lane in 2019
- ☒ The paving is planned to be inspected and any damaged slabs replaced
- ☒ The extent of further refurbishment and investment will be scoped during the development of the Turnpike Lane Improvement Plan

### Parking restrictions:

- ☒ Haringey Council has agreed to reconfigure parking spaces on the side roads to create 54 extra pay by phone parking spaces
- ☒ Six underused loading bays have been converted to 18 pay by phone parking spaces

## LIVEABLE CROUCH END

- ☒ A 'Liveable Neighbourhood Project' is Transport for London initiative which gives boroughs the opportunity to bid for funding for long-term schemes that encourage walking, cycling and the use of public transport
- ☒ In December 2017, the council secured funding from Transport for London to deliver a Liveable Neighbourhoods project for Crouch End
- ☒ Haringey's first liveable neighbourhood in Crouch End will radically change travel behaviour in a part of the borough characterised by high car ownership and a dominance of motor vehicles passing through the town centre
- ☒ There is an aspiration to align future plans for Turnpike Lane with what is happening in Crouch End
- ☒ The council's ambition is to bring more people to the area by walking and cycling
- ☒ Demand shows that there will be an increasing number of cyclists and there is potentially the need to provide a segregated cycle route to join Turnpike lane and Crouch End

## LAMPPOST BANNERS

- ☒ New brackets on lampposts have been installed to enable lamppost banner publicity/marketing campaigns. A trader led campaign to mark Ramadan is currently up on lampposts
