

Support for accessing Personal Protective Equipment (PPE) during Coronavirus outbreak.

There has been widespread disruption to the supply market due to the unprecedented demand for PPE.

In order to support local organisations to find PPE suppliers where the usual routes have failed, Haringey council has collated information from a number of businesses offering to supply PPE. This is presented in the table below.

Please note that this is not a list of recommended suppliers and Haringey council has not undertaken any due diligence checks on the suppliers or verified the standard of products supplied. Therefore, **it is your organisation's responsibility to carry out the necessary checks to ensure the products are suitable and meet the quality standards required by your organisation.**

Details about stock levels, prices and lead times must be confirmed with individual suppliers.

The material and information signposted is for general information purposes only. You should not rely upon the material or information as a basis for making any business, legal or any other decisions.
