Subject: Change of designation of the Pinkham Way site from employment use to industrial
Dear Sir

Change of land designation for DEA6 from employment land to locally significant industrial site

As a local resident I am writing to voice my disapproval of the proposed plan to change the classification of the Pinkham Way site from employment to industrial use

Despite being an active member of my community I am dismayed over the lack of information and communication from Haringey regarding this recent development. There has clearly been inadequate information disseminated to local residents and there is a strong sense that the wider community has been kept in the dark over this re-consultation process

My understanding is that the current site is listed as 'green space' and should be protected as such. Furthermore, the environmental impact of using the site for heavy industrial use will be colossal owing to the close proximity to local housing and schools. Should the site be allowed to be converted to industrial use our lives will be made a misery from the inevitable social cost and impact this will bring

I look forward to Haringey carrying out a full re-consultation of this important matter

Best regards

Kevin Stanfield
