The State of the Borough Profile has been put together to provide all Haringey’s stakeholders – from Officers and Councillors to Residents – with access to the data they need to understand the borough.

Only the most up-to-date and reliable data and sources have been included here, in order to provide an in-depth look at key areas of the Council’s work and remit, which often also includes the work and remit of our key partners. This single point of reference will be updated regularly, and used to drive the Council’s work, ensuring that our work is driven by the highest quality and most robust data.

Additional information on the data, sources and methodologies we’ve used to put together this profile can be found in the Appendix at the end. If you have questions about this profile please contact our Business Intelligence team: business.intelligence@haringey.gov.uk.
PEOPLE

• Haringey is a highly diverse borough. 38% of residents are from BAME groups and 26% identify as “white other”. 180+ languages are spoken.
• Deprivation levels are high, particularly in the northeast of the borough.
• GCSE attainment has improved comparative to England, but is below London, there are notable attainment gaps.
• Life expectancy in the borough is in line with the London average, though there are stark differences among different groups.
• Haringey residents report higher levels of life satisfaction than SNs or London, though there are higher rates of serious mental illness.

HOUSING

• In terms of tenure, the proportion of Haringey residents that are renting from the local authority or a housing association (29%), or privately renting (28%) has increased since 2011, while the proportion who own their home is decreasing.
• 3% of Haringey households are overcrowded, amounting to 3,000 in total.
• Haringey has the third highest rate of households in Temporary Accommodation in London, and the population outnumbers the availability of housing by approximately 12,000 people.

PLACE

• Facilities are good, with a range of cultural events and good transport links. Haringey also now has 25 Green Flag Parks.
• The rates of knife crime with injury and domestic abuse with injury are the ninth and third highest in London.
• 78% of residents say they have good friendships and/or associations in their local area, while 83% say relations between different ethnic and religious communities are good.
• Haringey has reduced its carbon emissions by 43% since 2005, and emissions are below London and UK levels.

LOCAL ECONOMY

• Jobs density in Haringey is relatively low, although the unemployment rate has improved to be just above the London average.
• Wages in Haringey are lower than average, and there are a larger number of JSA and ESA claimants than the London average.
• 7.2% of residents have no qualifications, greater than the London average.
• Median hourly pay in Haringey is 19% below the London average; we also have the second largest proportion of residents earning below the London Living Wage of all Inner London boroughs.
Housing
In 2016, 29% of Haringey residents rent from the local authority or housing association, and 28% rent from a private landlord. While most residents are happy with their home, happiness is lowest among social renters.

- Haringey residents are most likely to rent from the local authority or housing association (29%), though a similar proportion privately rents (28%). Both tenure types have increased since 2011, while the proportion of those who are buying with a mortgage has decreased significantly (now 26%).

- Tenure follows clear deprivation lines across the borough – eastern wards like Northumberland Park are least likely to own their home and most likely to be social renting while in western wards like Alexandra this trend is reversed.

- The 2018 Haringey Residents Survey found that the vast majority of residents (90%) say they are happy with the home they live in. Happiness with one’s home is highest among owner occupiers (96%), and lowest among social renters (79%).

- The 2015/16 English Housing Survey found private rental sector housing to be of lower quality than owner occupied and social rented housing across various measures. Circa 1 in 3 private rental sector homes were found to be non-decent in 2015, compared to 1 in 5 owner occupied and 1 in 6 social rented homes.
32% of households in Haringey are one person households. 49% of households in Haringey are working households and 16% are workless.

- Haringey has diverse household composition. 32% of households are one person households. 16% of households are couples with dependent children, and 11% are households with a lone parent with dependent children.
- 59% of Haringey residents live in a flat, maisonette, or apartment with the remaining 41% living in a whole house or bungalow.

**Source:** 2011 Census, Table LC4104EW
3% of households in Haringey are overcrowded (3,000 households). 46% of lone parent households with dependent children have at least 1 room less than the basic standard.

- 3% of households in Haringey are overcrowded, with over 1.5 persons per room. This is substantially higher than the statistical neighbour and London averages, and the 4th highest rate of all London boroughs.

- Many ethnic minority groups are over five times more likely to be in overcrowded households than those of White British ethnicity.

- 29% of households in Haringey have at least 1 room less than the basic standard. 24% of these households in Haringey are one person households.

- 58% of other household types with dependent children and 46% of lone parent households with dependent children are overcrowded.

- Across London those of Asian (14%), Black (11%) or Other (12%) ethnicity are more than five times more likely than those of White British ethnicity (2%) to be living in households with over 1 person per room.
Between 2011 and 2016, Haringey’s population grew at a faster rate than the number of households. Haringey has the third highest rate of households in TA in London.

Between 2011 and 2017 Haringey’s number of households grew at a slightly faster rate than the population (11% vs. 10.1%). Growth in both categories has slowed substantially in the last year, halving for both in 2016-17.

The median monthly private rent in Haringey is £1,425 (12 month rolling period to Q2 2018/19), slightly lower than the London median (£1,473). Median weekly local authority rents in Haringey are £105.56 (around £455 a month), which is also in line with the London median (£106.24). Both of these saw a fall for the first time in the last 8 years.

Median private rent has increased by 11.5% in the last 4 years, a higher rate than local authority rents (7.4%) but less than private rents in London on average (13.3%).

Just more than 3,000 households in Haringey (25 per 1,000 households) are living in temporary accommodation (statutory homeless). This is the third highest rate in London, and despite decreasing, it is 80% higher than the London level (14 per 1,000). 40% of residents accepted as statutory homeless are black, while 25% of youth homeless are LGBT, an over-representation compared to the wider borough population.
People: Adults
Haringey has a young, ethnically diverse population. The total resident population in Haringey is 282,904 and BME or Other White ethnic groups account for 63% of the resident population.

- The population pyramid demonstrates a gender split of males 50.7% to females 49.3%.
  - This is similar to London but differs from England in that the Haringey population is younger with a higher proportion of younger working age population (25 – 44 years)

- There are 60,877 children in Haringey aged 0-17 years, representing 22% of the population.
  - Haringey has 27,190 residents aged 65+ (10%).

- 63% of the Haringey population are from a BME group or Other White ethnic groups compared to 58% in London.

- Around 15% of residents in Haringey are from Black ethnic groups and just under one in ten are Asian (9%).
Over 180 languages are spoken by Haringey residents, and 30% of Haringey residents do not speak English as their main language.

- 30% of Haringey residents do not speak English as their main language. This is the 6th highest rate in London and is above the statistical neighbour and London averages.

- Of those whose main language is not English in Haringey, one in four (24%) either do not speak English well or do not speak it at all. This is the third largest proportion of all London boroughs, and is above the statistical neighbour and London levels.

- The proportion of Haringey residents saying they are Christian (45%) is in line with statistical neighbour boroughs (46%), and is slightly below London (48%), while Haringey residents are more likely to identify as having no religion (25% compared to 21% among both statistical neighbours and London).

Source: ONS Census 2011
Haringey's population is expected to increase by 4% by 2028, to 294,829, with the largest percentage growth in older age groups (65+), Other ethnic groups and Other White ethnic groups.

• By 2028, the ethnic groups with the highest expected growth are expected to have been the Other ethnic group and Other White, growing by 10% each, while Black Caribbean and Bangladeshi groups are expected to decrease by 12% and 8% respectively.

• The White British group will remain the largest population overall, followed by Other White and Black African.

• The highest expected growth is in the older age groups. The 85+ age group will rise from 3,136 to 4,209. The 65-84 group will rise from 24,054 to 31,103 people.

• The working age population will remain the largest population overall.
The greatest proportional population increase will be among older people in BAME ethnic groups.

- Overall, the proportion of the population whose ethnicity is Other White and Other ethnic groups will increase by 10% respectively, while Black Caribbean and Bangladeshi ethnic groups will decrease as a proportion of the overall Haringey population (-12% and -8% respectively) between 2018 and 2028.

- The largest increase by age groups is found in older people among:
  - Other white aged 65-85 (+36%, from 3,994 to 5,436 people)
  - Other Ethnic groups aged 85 plus (+91%, from 379 to 731 people)
  - Black Caribbean aged 85 plus (+47%, from 498 to 731 people)
  - Bangladeshi aged 85 plus (+132%, from 22 to 51 people)
The over 65+ population will see increased concentration in the West of the Borough, while the proportion of residents aged under 18 is not expected to change substantially.

- Despite the large percent increase, the population over 65 is projected to account for only 12% of Haringey’s population in 2028, a total of 35,312 residents.

- The percentage of the population that is under 18 is not expected to change significantly, and will remain most concentrated in the East of the Borough.
Haringey is the 6th most deprived borough in London, with deprivation more concentrated in the north east. Deprivation has reduced since 2010, though Haringey’s London ranking has not shifted significantly.

- Haringey is ranked 30 out of the 326 local authorities in England with respect to deprivation, and is the 6th most deprived in London as measured by the IMD score 2015 (where 1 = most deprived). The Index takes into account a range of deprivation types, including income, employment, education, health, crime, barriers to housing and services and living environment.

- The most deprived LSOAs (Lower Super Output Areas or small neighbourhood areas) are more heavily concentrated in the east of the borough, where more than half of the LSOAs fall into the 20% most deprived in the country. By comparison, in the west a very small proportion of LSOAs fall into that category, and in the westernmost wards – Highgate, Fortis Green, Muswell Hill and Crouch End – there are none.

- Although Haringey's overall IMD score has improved since 2010, improvements have been seen across London meaning that Haringey still ranks among the most deprived boroughs in the capital.
Although life expectancy has increased in Haringey and is now similar to London and England, there is still inequality in life expectancy across the social gradient and between genders.

In Haringey, both male and female life expectancy are similar to London, but greater than the England average – just under a year greater for male life expectancy and just over 1.5 years greater for female life expectancy.

In Haringey, men have greater inequality in life expectancy than women across the social gradient (7.6 vs 4 fewer years for those living in the most deprived areas than those living in the least deprived areas).
There are significant gaps in healthy life expectancy between populations in Haringey: the gap in healthy years of life between richest and poorest deciles is 15 years for men and 17 years for women.

- The gap in healthy life expectancy (years lived in good health) in Haringey is much larger than the gap in life expectancy itself.
- Haringey residents spend on average the last 20 years of life in poor health.
- Male healthy life expectancy (65) in Haringey is over a year higher than London and England, whilst female healthy life expectancy (64.5) is in line with London and higher than England.
- While women in Haringey live longer than their male counterparts, on average, their last 20 years are spent in poor health compared to the last 15 years spent in poor health among men.

Source, PHOF, 2018
Cancer, cardiovascular disease and lung disease are the main causes of early death (deaths under the age of 75) in Haringey. The most common habits associated with long-term conditions, poor health and early death in Haringey are poor diet, smoking and high blood pressure.

• One in 5 adults in Haringey have high blood pressure and a third of our residents are not getting enough physical exercise.

• Overall smoking rates are falling nationally and locally but it remains one of the biggest drivers of the life expectancy/healthy life expectancy gaps in Haringey. Rates remain persistently high in certain groups including people working in manual jobs, people with mental illness and people homeless.

Source: PHE Longer Lives Tool, 2016
Haringey residents report higher levels of life satisfaction but higher levels of anxiety than SNs or London. Most residents are optimistic about the future, though there is variation across demographic groups.

- Although Haringey residents report having better life satisfaction levels and similar levels of feeling worthwhile in the things they do compared to the SN and London averages, the borough is below average in terms of self-reported day to day happiness and in anxiety levels.

- Nevertheless, between 2011/12 and 2017/18 Haringey saw improvements in 3 of the 4 measurements, as was the case across London. However Haringey’s mean anxiety score remained the same, whilst others have fallen 8%.

- More recently in our Residents’ survey two thirds of residents said they’d been feeling optimistic about the future often or all of the time (66%). There was, however, substantial variation among different groups, as seen opposite.

- A UK-wide study found that all minority ethnic groups have lower life satisfaction than those of white ethnicity, linked to socio-economic status and levels of deprivation. (Source: ISER).

*In relation to anxiety, a lower score represents lower levels of anxiety and is therefore more positive*

Source: Annual Population Survey, ONS 2018

Two thirds of residents say they’ve been feeling optimistic about the future often or all of the time (66%)

- Optimism is higher among younger residents than older residents
- Optimism is lower among unemployed and permanently sick/disabled residents
- Optimism is highest among those who private rent, and lowest among those who social rent

Source: Residents’ Survey 2018
Haringey has similar rates of depression (7%) compared to London but higher rates of serious mental illness (1.3%).

The percentage of adults in receipt of secondary mental health services living in stable and appropriate accommodation was significantly lower than the London average for both men and women:

- Among women: 35%
- Among men: 30%

Around 17,050 people in Haringey or 7% of the GP registered population, are diagnosed with depression, not significantly different to London. This is estimated to be only a third of people living with common mental illness in Haringey.

4,100 people have been diagnosed with severe mental illness in Haringey (1.35%), significantly higher than the London average of 1.1%.

- Suicide rates in Haringey have significantly decreased over the last ten years, however Haringey still has one of the highest rate in London.
- Central and East Haringey exhibit high levels of risk factors for poor mental health, such as deprivation, unemployment and homelessness, and many people have experienced trauma. These are more concentrated in the East of the borough.
The rate of newly diagnosed HIV in Haringey has reduced in recent years but is still above England rates. Late diagnoses of HIV and teenage pregnancy rates have markedly declined in recent years.

- The rate of new diagnoses of STIs (excluding chlamydia in those aged under 25) was 1,778 per 100,000 compared with 1,547 for London & 795 for England (2016).
- STI and HIV rates are highest in NE Tottenham and SE Tottenham localities, particularly Northumberland Park, Seven Sisters and Tottenham Hale.
- Teenage pregnancy rates in Haringey have seen a marked decline and are not statistically different to London, although are still a greater value (19.2 per 1,000 versus 17.1) (2016).

35.6% of HIV is diagnosed at late stage in those aged 15+ in Haringey. This is a marked reduction over the past 4 years and is similar to London (33.9%) & below England (40.2%).

[Graph showing Crude rate of conceptions per 1,000 women aged 15-17 years by area of residence, 1998-2016 (3 year rolling average).]
While the proportion of people smoking in Haringey has reduced over the years, there are marked inequalities in smoking rates amongst some groups.

15.6% of adults in Haringey are smokers.

Those with depression, schizophrenia and who are homeless are significantly more likely to be smokers, compared to the general population.

Although there has been a decrease in overall smoking prevalence, it is higher in more deprived parts of the borough (24.2%). Those with depression, schizophrenia or who are homeless are also more likely to be smokers.

- 9% of young people of White or Mixed Ethnicity are regular or occasional smokers at the age of 15, compared to 3% of those of Black ethnicity and 2% of those of Asian ethnicity.

- Haringey sells the most litres of alcohol per adult in all of London, 35% more than the London average;

- The high level of sales points to high levels of unsafe drinking, as Haringey also has a rate of alcohol-related hospital admissions significantly higher than the London average.

- Overall there has been a reduction in young people’s alcohol and drug use, demand for our young people’s service remains stable and more present with use of very potent new psychoactive substances. Drug related deaths are peaking, with problematic substance misuse linked to deprivation.
People: Children & Young People
Haringey has a larger proportion of babies with low birth weight compared to London, while the rate of asthma-related hospital admissions among under-19 year olds is lower than the London average.

- In 2016, the percentage of babies with low birth weight was higher in Haringey (3.2%) compared to London (3%) and England (2.8%).
- There is a lower percentage of asthma-related hospital admissions among children under 19 years old compared to the London average (178 per 100,000 vs 203 per 100,000).

91% of eligible children in Haringey (5 year olds) have received one dose of the MMR vaccine in 2016/2017, which is equal to London, but lower than England (95%).

100% of children in care in Haringey (305 in total) were up to date with their immunisations in 2017.

181 per 100,000 children (110 children in total) under 19 were admitted to hospital for asthma in Haringey in 2016/17. This is less than London (201 per 100,000) and England (203 per 100,000).

Percentage of "Low Birth Weight Babies" in Haringey, compared to London and England

Source: PHOF 2018
Boys (69%) and pupils with free school meal status (69%) are less likely to reach a good level of development at the end of reception, compared to the Haringey average (75.6%).

- In 2017/18, 75.6% of 5 year olds in Haringey were reaching a ‘good level of development’ at the end of reception, similar to the London average (73.8%).
- The proportion of 5 year olds reaching a good level of development has increased over time, as have the national and London trends, but Haringey’s proportion is now significantly higher than the England average, and slightly above London.
- Boys (69%) and pupils with free school meal status (69%) are less likely to reach a good level of development at the end of reception, compared to the Haringey average (75.6%). Only Girls saw their percentage increase in the last year.
GCSE attainment in Haringey has improved significantly over time, though performance is slightly below the SN and London averages. Haringey's Progress 8 score is below SN’s and London, a drop compared to last year.

Haringey ranks 71st in England (out of 152 local authorities) for GCSE attainment (% pupils achieving strong 9-5 pass in English and Maths). Although in the 2nd quartile, this represents improved performance since 2015.

- Haringey currently ranks 71st in England for GCSE attainment, out of 152 local authorities. The borough has improved considerably since its 2015 rank of 105.
- While performing comparatively well at the national level, 61.8% of Haringey pupils achieved a standard 9-4 pass in English and Maths in 2016/17, which is slightly below the statistical neighbour (65.4%) and London (68.2%) average.
- The proportion of those achieving a strong 9-5 pass (42.5%) is also slightly below the SN (45.9%) and London (47.7%) means.
- Haringey pupils show positive signs of improvement in their education, with a higher than average Progress 8 score (+0.16), however when compared to SN and London, other pupils are performing better.

The Progress 8 score aims to capture the progress a pupil makes from the end of primary school to the end of secondary school. The measure compares pupils’ key stage 4 results to those of other pupils nationally with similar prior attainment, providing an evaluation of their comparative progression.
Attainment varies substantially, and is particularly low among black boys. There is a comparatively small attainment gap in Haringey between pupils on free school meals and those that are not.

- There is significant variation in attainment across Haringey’s wards, with 35% in Highgate achieving 5 or more GCSEs at grades 9 to 4 including English and Maths, half the proportion of pupils that achieve the same in Alexandra (80.7%).

- There are substantial attainment gaps between different demographic groups. Black boys have the lowest attainment of all ethnic and gender groups (in 2015/16 52.3% achieved A*-C in English and Maths, compared to 61.3% of all pupils across London.

- While there is a clear attainment gap between children on free school meals in the borough and those who are not, the gap is relatively small in Haringey. 54% of pupils eligible for free school meals achieve A*-C in English and Maths, while 63.7% of pupils across the borough do. This 9.7% percentage point difference is much smaller than the average across all London boroughs (16.7%).

*There is no secondary school in Highgate, and attainment is thought to be particularly low due to many pupils going to school out of borough and there being a smaller base size for this group.*
People: Post-16 & Post-18 Outcomes

Post-KS5, Haringey pupils are less likely to go on to HE institutions than pupils among SNs and London boroughs. Pupils leaving KS4 and KS5 are also less likely than those in SNs and London to take on an apprenticeship.

- After completing **KS4**, Haringey pupils are more likely to go to a 6th form college or FE college (or other FE provider) than the average, and less likely to go to a state-funded school 6th form.

- After completing **KS5**, Haringey pupils are less likely than average to go to HE institutions (62%, compared to 64% among SNs and London), and more likely to go to FE colleges or other FE providers (5%, vs. 4% among SNs and London).

- Although Haringey has fewer pupils going into HE generally, the proportion going to Top Third most selective HEI's is in line with SN's and London (Haringey: 26%, SN's: 24%, London: 27%).

- Haringey pupils from state-funded mainstream schools are less likely than average to take up an apprenticeship. This is evident among KS4 leavers, and more marked among KS5 leavers (see left).

- While the proportion of NEET 16 and 17 year olds in Haringey (1.6%) is in line with SNs and London (1.8%), Haringey has a larger proportion of Mixed Race and Black or Black British 16-17 year olds who are NEET compared to the SN and London averages. It’s worth noting that Haringey has a larger proportion of 16-17 year olds whose activity is not known (10.2%, compared to just over 3% among SNs and London), suggesting there may be a larger proportion who are NEET in the borough.

Source: DfE 2017/18
Compared to London, Haringey has a similar proportion of young people that have a learning disability (LD), but a higher rate of pupils with autism.

- LD - Downward trend for 2017/18 where Haringey is comparable to the London rate at 25.9 per 1,000 pupils.

- In 2018, a rate of 18 children per 1,000 pupils in Haringey were known by schools to have Autism, a higher rate than the London average (15 per 1,000 pupils).

- The percentage of all school age pupils with special educational needs (SEN) in Haringey has a downward trend over time, but is still significantly higher than the London and England averages (15.2% compared to 14.3% and 14.6% respectively).

- Of all London boroughs, Haringey has the 7th largest proportion of secondary school pupils with special education needs (compared to 18th at primary).

Source: fingertips.phe.org.uk
Source: DfE 2018
An estimated 5,700 Haringey residents aged 14 and over are estimated to have a learning disability, and around 2,100 residents are estimated to have autism.

- It is estimated that 5,718 Haringey residents aged 14 and over have a learning disability, including 1,111 residents aged 14-25.
- Of these residents, around 1,260 are estimated to have a moderate or severe learning disability and hence are likely to be in receipt of services.

Around 2,100 Haringey residents aged 14 and over are estimated to have autism, including 680 residents aged 14-25.
In Haringey in 2017/18, 22% of all Reception year students and 37% of all Year 6 students were recorded as overweight or obese.

The prevalence of overweight/obesity among Year 6 students was significantly higher than the Haringey average among pupils from Black ethnic groups:

- 46% students from Black ethnic groups were overweight or obese.

and significantly lower than the Haringey average among White ethnic groups:

- 32% among students from White ethnic groups.

- In 2017/18, in Reception and Year 6, there was a significant difference between the prevalence of overweight/obesity among students living in the most deprived areas of the borough and students living in the least deprived areas of the borough.

- There was a significant reduction in prevalence of overweight/obesity in Reception children from Mixed ethnic groups; 15% compared to the Haringey average of 22% respectively.

- In Reception children there was no significant variation by gender but there was in Year 6:
  - A significantly higher proportion of male students (40%) were overweight/obese in Year 6 than female students (34%).

- The prevalence of overweight/obesity among Year 6 students from Black ethnic groups was significantly higher than the Haringey average.
The proportion of pupils with Social, Emotional and Mental health needs in Haringey is lower than the average London and England rates.

- In 2018 the proportion of pupils of all ages with social, emotional and mental health needs in Haringey was 1.9%. This is lower than both the London and England averages of 2.2%.

- In 2017, 39% of boys and 29% of girls in Year 6 had high self-esteem scores in Haringey. Among Year 8 and 10 students, 31% of pupils had high self-esteem scores.

- The rate of hospital admissions for self-harm in 10-24 year olds was 184 per 100,000, similar to London but significantly lower than England.
Haringey has the second highest rate of drug use (excluding Cannabis) among 15 year olds of all London boroughs. There is also a higher than average rate of 17 year olds cautioned or sentenced in the borough.

- 2.4% of 15 year olds in Haringey say they have taken drugs in the last month (excluding Cannabis). This is more than double the SN and London rates, and is the second highest of all London boroughs.

- Though the rate of 10 to 14 year olds cautioned or sentenced in Haringey is lower than the SN average and in line with London, the rate of young people cautioned or sentenced in the borough increases more sharply with age. The rate of 17 year olds being cautioned or sentenced is substantially higher in Haringey (29.6 per 1,000) than it is among SNs or London (25.4 and 20.7 per 1,000 residents respectively).
Among Haringey’s most prolific youth offenders, signs of poor parenting was evident in the first year of life in 45% of cases; 90% had experienced loss of a parent through death or separation by the age of 5; and 30% had witnessed domestic violence by the age of 7.

- In their early years, there are a number of events and circumstances that are common to Haringey’s 20 most prolific youth offenders.

- Poor parenting is evident in the first year of life in 45% of cases; parental involvement in substance or alcohol misuse is evident in 30% of cases by the age of 1; and 90% have either experienced loss of a parent through death or separation by the age of 5.

- Among the 20 most prolific youth offenders, the average age at which they initially came to the attention of an agency due to behavioural concerns is 4 years old.
Place
Haringey is made up predominantly of residential properties. Commercial centres can be found in a number of locations across the borough, with Wood Green and Tottenham High Roads being the biggest.

Character Types of Haringey

- Haringey is mostly residential, with urban terrace and villa / townhouse residences being most common.
- By contrast, industrial and business properties are less common in the borough.
- The main commercial centre is around Wood Green High Road, while there are smaller town centres in Crouch End, Green Lanes, Muswell Hill and Tottenham Hale, among others.
54% of Haringey residents agree that police do a good job in the local area – the lowest level of all London boroughs. In some neighbourhoods as many as half of residents say they feel unsafe after dark.

- 15% of residents say they feel unsafe when outside in their local area after dark.
- Residents of North Tottenham (49%) and West Green & Bruce Grove (24%) are most likely to say they feel unsafe after dark, while those in Crouch End and Muswell Hill are least likely to say they feel unsafe.

- 55% of Haringey residents agree the police do a good job in the local area, compared to an average of 66% across London. This is the lowest level in London. Confidence in all areas of policing tested had come down in the three years since 2014.

- 15% of Haringey residents feel unsafe in their local area after dark. Those in North Tottenham and West Green & Bruce Grove are most likely to say they feel unsafe, while those in Crouch End and Muswell Hill are least likely to say they feel unsafe.

- Despite this, residents’ sense of place and community in Haringey appears to be strong. Three quarters say they have good friendships and/or other associations in their local area, and over four in five say there are good relations between different ethnic and religious communities.

11% of Year 8 and 10 students in Haringey report having been a victim of violence or aggression in the area where they live in the last 12 months.

Haringey has the third highest rate of domestic abuse with injury in London. Haringey’s Knife crime with injury statistic has improved but is still the ninth highest in London.

- In 2018/19 so far Haringey has the ninth highest rate of knife crime with injury in London, at 4.7 incidents per 10,000 residents. This is a much improved performance in last year which saw the second highest rate in London, but is still far above the London average.

- The incidence and rate of domestic abuse with injury is substantially higher in Haringey compared to the SN and London averages. In 2018/19 so far Haringey has the third highest rate of all London boroughs (26.4 per 10,000 residents), and the sixth largest number of incidents (733).
Haringey saw a 5% increase in overall hate crime comparing Q1-3 2017/18 with Q1-3 2018/19, with particular decreases in Islamophobic, Anti-Semitic, and Faith Hate Crime. Haringey saw sharper decreases in these areas than London.

- There was a 5% decrease in hate crime in Haringey in 2018/19 compared to the same period in the previous year, with the sharpest decreases seen in Islamophobic hate crime (40% decrease) and anti-Semitic hate crime (42%).
- Haringey’s reduction is better than the London picture in almost all categories, the exception being Disability hate crime.
- The number of reported disability hate crime incidents has increased substantially in Haringey, in contrast to the slight reduction in London overall in the same period.

Source: MPS 2018
Haringey has over 120 venues where cultural activity takes place, and over 70 events occurring annually. There is a good spread of cultural venues across the borough.

- Haringey has over 120 venues where cultural activity takes place, and over 70 events occurring annually – from community theatre to large scale music events.

- While there are clear clusters of activity (for example around Alexandra and Finsbury Parks, Noel Park, Crouch End and Tottenham Green), cultural venues are well spread across the borough, meaning that there is good access to culture for residents.

- There are over 2,300 creative and cultural industry (CCI) enterprises in Haringey, which are estimated to employ over 5,220 people and deliver nearly £211m of GVA. There is a larger concentration of creative and CCI enterprises in the west of the borough.
Just over a quarter (27.8%) of Haringey is made up of open space, compared to a borough average of 33% for London. Access to nature varies substantially between different wards.

- Just over a quarter (27.8%) of Haringey is made up of open space*. Although below the borough average for London (33%), Haringey has many public parks and open spaces, including most notably Alexandra Park in the middle of the borough, and Finsbury Park in the south.

- There is substantial variation in the amount of open space in different wards. For example, while all homes in Alexandra and Bounds Green have good access to nature, just two fifths of homes in West Green (38%) and Noel Park (41%) do. Broadly speaking, access to metropolitan parks in Haringey is very good, while access to local, small or pocket parks and district parks is less good.

- Haringey now has 25 Green Flag Parks (judged to be welcoming, safe and well managed with active community involvement). Three new flags were appointed in 2017 (Highgate Wood, Alexandra Park and Tottenham Marshes).

*In accordance with the GiGL database, the category of ‘open space’ includes areas where ‘restricted’ or no information is designated, while areas with homes with ‘good access to nature’ constitute those that have access to public open green space.
Grant Thornton’s Vibrant Economy Index provides a different way of evaluating the local economy, by looking beyond traditional measures of economic success and incorporating measures on health, happiness, equality, environmental resilience, community and opportunity.

On this Index Haringey falls in line with the English average, ranking 166th out of 324 local authorities across the country. Compared to neighbouring boroughs, Haringey’s performance is again middling, with a more vibrant economy than Enfield and Hackney, and a less vibrant economy than Camden, Barnet and Islington. Haringey’s ranking has improved in the last two years, after dropping to a rank of 200 in 2015.

Of the different dimensions that make up the Vibrant Economy Index, Haringey sits in the top tercile in the country for Resilience and sustainability, as well as Community, trust and belonging. Haringey falls into the bottom performing tercile in the country for just one dimension: Inclusion and equality.

Numbers show the borough’s ranking out of 324 English local authorities; the lower the number the better the performance. Colour coding represents: top tercile performance; second tercile performance; bottom tercile performance.
Haringey has reduced its carbon emissions by 40% since 2005, and emissions are now below the level seen among neighbouring boroughs, London and the UK.

- Haringey has the second lowest carbon emissions among its neighbouring boroughs, just above Waltham Forest with 2.6 tons of CO2 per capita. This is substantially below the Greater London (3.5) and England levels (4.7).
- Haringey has reduced its overall carbon emissions by 43% since 2005. This is a sharper reduction than the national level (36% decrease), though it is in line with London (43% decrease).
- The largest proportion of Haringey's carbon emissions come from the domestic sector (49%), with this sector over-represented compared to neighbouring boroughs (41%), although Haringey was the only Borough to record a reduction in these emissions in 2016.
- Industry and the commercial sector are slightly under-represented compared to the neighbouring boroughs (27% vs. 30%), as are Transport sector emissions (24% vs. 26%).

Haringey’s 2020 Target is 629.8 Kt, requiring a reduction of 11%. Haringey is currently on target.
Air pollution in Haringey is in line with London, as is the fraction of mortality attributable to particulate air pollution. This is, however, higher than the England rate and has a particularly negative impact on children.

- Haringey does not have among the highest levels of air pollution (the average PM2.5 level is 15.95 across all Haringey neighbourhoods, compared to 16 in London). However, there are pockets where pollution is particularly high (e.g. Harringay).

- The fraction of mortality attributable to particulate air pollution is 6.7%. This is in line with London (6.5%), but substantially higher than England (5.1%).

- Young people are a particular focus for the London Mayor’s air pollution strategy, due to the increased impact. 0-5 year olds make up three times as many admissions for asthma in NCL as 6-18 year olds.

- 24% of the capital’s primary schools are in areas that breach the legal limit for NO2, according to the Greater London Authority. Three of Haringey’s primary schools were part of the Mayor’s audit on air pollution affecting primary schools, and will receive extra funding.
Litter and dirty or run down surroundings rank among the things residents most dislike about living in their area. Around three quarters of residents are satisfied with recycling and refuse collection, while half are satisfied with local tips, reuse and recycling centres.

- After crime and antisocial behaviour, residents are most likely to cite litter as the thing they most dislike about living in the area (33% say this). More than one in seven say they most dislike that the area is dirty or run down (15%).
- Despite this, the majority of residents say they are satisfied with recycling collections (77%) and refuse collections (73%), though levels of satisfaction have come down since last year.
- Satisfaction with local tips and reuse and recycling centres (51%) and bulky waste collection (35%) is substantially lower and has also decreased since 2016.
- Recycling rates in Haringey increased sharply between 2011/12 and 2014/15, but have since plateaued at 37%. Over the same time period the average waste generated per household has steadily decreased.
Haringey has 18 overground and underground stations, and TfL’s 2015 PTAL evaluation found the borough to have moderately good access to public transport, with access broadly better in the east than the west.

- Haringey has 11 overground and 7 underground stations, with the east of the borough better connected by tube and rail stations than the west. Although there are a number of bus routes, there is no overground or underground line that connects east and west.

- According to Transport for London’s 2015 Public Transport Access Level (PTAL) measurement, Haringey has moderately good access to public transport across the borough. The borough received a PTAL score of 3 (on a scale where 0=very poor access and 6b=excellent access).

- Individual wards in Haringey received scores ranging from 2 to 6a (Tottenham Green). Seven of Haringey’s 19 wards received scores higher than 3.
Local Economy
Haringey has fewer jobs than the statistical neighbour and London averages, and between 2012 and 2017 the jobs market has grown at a slower rate in Haringey. Jobs density in the borough is the 4th lowest in London.

- There are 92,000 jobs in Haringey, which is just under half the London average (186,000) and substantially lower than the statistical neighbour average (167,000).
- The number of jobs in Haringey has grown by 9.5% in the last 5 years, lower than both the London growth rate (14.6%) and our SN average (15.2%)
- Jobs density in Haringey (0.48) is also notably lower, at less than two thirds the SN rate (0.8) and half the London rate (1.02).
- Haringey has the fourth lowest jobs density of all London boroughs.
Haringey's population decreases by about 16% during the workday, indicating that residents leave the borough for work.

- The total daytime population of Haringey in 2014 was 225,474, including 15,590 visitors/tourists.
- The ratio of daytime to resident population in Haringey (0.84) was the lowest in North Central London.
Unemployment levels in Haringey have fallen at the same rate as statistical neighbours and London, and are currently in line with SN and London averages. Haringey has however, a larger than average number of JSA and ESA claimants.

- In the last 5 years levels of unemployment in London have been decreasing while levels of employment have been increasing. In Haringey residents’ unemployment levels have reduced in line with the comparative SN and London reduction levels.

- Haringey’s currently unemployment level (in the 12 months to September 2018) is 5.3%, in line with SN’s (5.3%) and London (5.1%).

- Haringey has a larger number of JSA and ESA claimants than the SN or London averages. While the number of JSA claimants in Haringey has decreased by 59% in the last 5 years, this is a smaller percentage than our SN or London. Also the number of ESA claimants has increased by 20%, which is greater than the rise across our SN or London.
Local Economy: Qualifications and the Jobs Market

Haringey has an improved proportion of residents with no qualifications, now only the 12th highest amongst London Boroughs. Compared to London’s labour market, Haringey has an over-representation of residents with no qualifications.

- 7.2% of Haringey residents have no qualifications, the 12th largest proportion of all London boroughs, although this is an improved position on 4th highest last year. In the Tottenham constituency residents are three times more likely to have no qualifications (11.1% compared to 3% in Hornsey and Wood Green). By contrast, 81% of Hornsey & Wood Green residents are educated to NVQ3 level or above, compared to 55% of Tottenham residents.

- Within the London labour market 4% of jobs make up roles that require no qualifications, while 9% require NVQ1 or Other Qualifications. Haringey has twice as many residents in each of these categories (8.7% and 18.1% respectively), while those with higher qualifications are under-represented compared to the wider labour market.

- Of all English local authorities, Haringey ranks 34th on the Social Mobility Index out of 324 local authorities in England, meaning the borough is considered among the best places for social mobility. The social mobility index is calculated using a range of measures, from educational attainment among children on free school meals, to median weekly salary.

Haringey ranks 34th on the Social Mobility Index out of 324 local authorities in England, meaning the borough is considered among the best places for social mobility.
In-work poverty is increasing in all working household types, and three in five Londoners in poverty are from a working family (58%).

58% of Londoners in poverty **live in a working family**. This has **increased from 44%** a decade ago

*Source: Trust for London, 2018*

In-Work Poverty in London, by Employment Status

- Three in five Londoners in poverty are part of a family that has at least one working member (58%).
- Across the capital, in-work poverty has increased among all household types since 1996/7. This is largely attributed to employment increasing at a faster rate than income growth.
- In-work poverty is highest in households where one or more residents work part-time (and no one works full-time, 45%).
- An increasing amount of income in middle-income households with children now comes from benefits and tax credits (currently 30%, up from 22% 20 years ago).

*Source: Living Standards, Poverty and Inequality in the UK: 2016, IFS*
Haringey workers and residents tend to earn less than average; median hourly pay among Haringey workers is below the SN and London rates, while the proportion of residents earning below the LLW is higher.

- Median hourly pay for those working in Haringey is £14.87. This is 14% lower than the SN average, and 20% lower than the London average.
- Median hourly pay has increased by 9% in Haringey since 2014. This is in line with the rate of growth in our Statistical Neighbours (10%) and London (8%)
- There is substantial variation in income between those living in east Haringey (Tottenham constituency) and those in the west (Hornsey & Wood Green constituency). Median hourly pay of residents in the west is in line with the London top quartile, while those in the east earn 33% lower.
- Of all Inner London boroughs, Haringey has the second largest proportion that are earning below the London Living wage (29%). The proportion of residents earning below the London Living wage has increased by 47% since 2013, also the second largest increase amongst inner London boroughs.
- These findings suggest that in-work poverty is likely to be a significant issue for many residents.

Source: Annual Survey of Hours and Earnings, 2014-2018
Haringey has a higher than average number and rate of children living in all out-of-work benefit claimant households compared to London, though this is not among the highest levels in London. Children in the east of the borough are substantially more likely to be affected by income deprivation than those in the west.

- 12.6% of Haringey households (approx. 13,400) live in Fuel Poverty, the 4th highest percentage in London and substantially above the London average (10%). Fuel poverty is concentrated in the centre of the borough.
- In 2017 8,820 children in Haringey were living in all out-of-work benefit claimant households. This is a larger number than the London average (7,900), but is below the SN average (9,915).
- In Haringey this equates to 14.4% of all 0-18 year olds in the borough, and is the 10th highest rate of all London boroughs.
- Approximately one in seventh Haringey pupils are eligible for and claiming free school meals (14.3%). This is in line with London (14.9%), and below the SN average (17.2%).
- Neighbourhoods in the east of the borough rank much more highly on the index of income deprivation affecting children, compared to neighbourhoods in the west.
Key groups
4% of Haringey residents are gay or lesbian, representing the sixth largest gay and lesbian community in London.

**Key groups: LGBTQ+**

- Haringey has the sixth largest gay and lesbian population of all London boroughs (4%), and is above the London mean (3.1%).

- Based on 2016 mid-year estimates, this means that Haringey’s gay, lesbian and bisexual community consists of over 8,900 gay and lesbian residents aged 16+, and over 4,400 bisexual residents aged 16+.

- It is difficult to estimate the trans population in Haringey as estimates vary widely. The latest national estimates range from 65,000 to 300,000.

- LGBT residents are more likely to experience hate crime or homelessness.

A recent Galop survey found that, nationally, **4 in 5 LGBT people have experienced hate crime related to their gender identity or sexual orientation in their lifetime (79%)**

- 25% of youth homeless in Haringey are LGBT

In Haringey, a significant minority of **16% of residents say they feel isolated living in their local area.** The proportion of residents saying this is highest among older residents aged 45+.

• The frequency of ill health rises with increasing age. Older people are particularly vulnerable to CVD, diabetes, depression, dementia and falls.

• 1,189 Haringey residents over 65 have been diagnosed with dementia (4%), a significantly lower prevalence than London and England. PHE estimates that 68% of Haringey residents with dementia have been diagnosed, similar to the London and England averages.

• The propensity for social exclusion among older people in Haringey is high, with the borough’s LSOAs on average ranking 8th highest of all London boroughs.

• Each year, an estimated 8,100 falls occur among Haringey's 65+ population. 6% of all estimated falls are admitted to hospital.

Key groups: Older people

There are 27,190 people over 65 living in Haringey in 2018. This population is expected to see the most significant growth of any age group over the next ten years, growing by 30% to 35,312 residents in 2028.
4,500 people have a serious physical disability in Haringey. Almost 5,000 people have sight loss which impacts upon daily living and around 15,700 adults have a moderate or severe hearing impairment.

- More than 19,500 people in Haringey have a physical disability; this equates to approximately 10% of the population aged 16-64.
- There are 1,090 people living with a learning disability in Haringey. The prevalence of learning disabilities is similar to the London average and significantly lower than the England average.
- The percentage gap in employment between people with learning difficulties and the overall population is 66% in Haringey (2017/18), similar to the average for both London and England.
- Among ESA claimants in Haringey mental illness is the most commonly cited disease category, followed by musculoskeletal disease.
APPENDIX A: Explaining the Data
Below is additional information on the data, sources and methodologies we’ve used to put together this profile. If you have any further questions that are not answered here please contact the Business Intelligence team: business.intelligence@haringey.gov.uk.

- **Age breakdowns**: Age groups may be divided and analysed in different ways according to the topic area. As a general rule, we would recommend performing analysis by age using the following breakdowns: 0-17; 18-34; 35-49; 50-64; 65+. However, it is plausible (and recommended) that you may decide to split out some of these age groups differently depending on the topic or in order to conduct more granular analysis.

- **IMD**: The Index of Multiple Deprivation (IMD) is the DCLG’s official measure of deprivation, which ranks all LSOAs in England according to how deprived they are. The Index is calculated using a number of measures across employment, education and skills, health, crime, housing and living environment.

- **LSOAs and MSOAs**: Lower-layer Super Output Areas (LSOAs) and Middle-layer Super Output Areas (MSOAs) are the area designations used for small areas, and were designed to allow analysis at a more local level than borough level. LSOAs are smaller and cover a population of between 1,000 and 3,000. MSOAs cover a population of between 5,000 and 15,000.

- **Population Projections**: A variety of sources are available for population estimates and projections. In this presentation, we have used data published by the Greater London Authority, specifically the 2017 round of housing-led projections. These projections are used because they incorporate the latest available Strategic Housing Land Availability Assessment (SHLAA) development trajectory.

- **Statistical Neighbours (SNs)**: Using the Statistical Neighbour model allows us to benchmark our performance against the boroughs that are, statistically speaking, most similar to us. We use the CIPFA Nearest Neighbours model, which identifies the following boroughs as our Statistical Neighbours: Brent; Ealing; Enfield; Greenwich; Hackney; Hounslow; Islington; Lambeth; Lewisham; Merton; Newham; Southwark; Tower Hamlets; Waltham Forest; Wandsworth.
