**Subject:** Objection to the land usage changes at Pinkham Way

I am writing to object to the changes made by Haringey Council to the usage of the Pinkham Way site from employment use to industrial land use.

I am opposed to what Haringey Council formally refers to as - Employment land designations in SP8 Employment of the Core Strategy, change of land designation for DEA6 from employment land to a locally significant industrial site - for many reasons, the most important of which is the result of these changes paving the way for the proposed use of the area for a huge waste plant that will affect the local neighbourhood dramatically.

As a parent I am extremely concerned about the environmental impact of using the site for industrial use when the proposed site is so close to the schools and parks that my children use on a daily basis.

I am angered by the underhand way in which Haringey Council has tried to make this land use change without adequately consulting the local people in the first place and their continued refusal to talk to the many residents opposed to the both the usage change and the proposed plans during the re-consultation process. It further enforces the popular belief that Haringey Council already know that the whole scheme is wholly unsuited to the Pinkham Way site - a site that Haringey Council had previously listed as green space that should be protected.

I also am also concerned at the loss of the site for employment use and the impact this will have on creating new jobs at a time when creating employment has to be a major priority for all councils.

I therefore strongly urge Haringey to listen to the local residents and reconsider the land usage change and ask the Independent Planning Inspectorate to do their utmost to prevent the change.

Yours faithfully

Joey Toller
