1 Background

- 1.1 On 24 May 2016 Haringey Council submitted four emerging Local Plan documents – **Alterations to Strategic Policies, Development Management, Site Allocations and Tottenham Area Action Plan** – to the Secretary of State. An independent Planning Inspector, Christine Thorby MRTPI IHBC, was then appointed to conduct an examination of the Local Plan documents.
- 1.2 Examination hearings on the Local Plan documents were held between August and September 2016, subsequent to which the Inspector set out a series of **Main Modifications** considered necessary to ensure the emerging Local Plans are sound. A series of other **Additional (Minor) Modifications** have also been proposed, aimed mainly at improving the legibility and readability of the documents.
- 1.3 The Main and Additional Modifications will be subject to a statutory 6-week public consultation.
- 1.4 The Main and Additional Modifications have not previously been assessed through the **Sustainability Appraisal (SA)** and **Habitats Regulations Assessment (HRA)** process and therefore need to be appropriately considered. The modifications are the focus of this SA/HRA Report Addendum, discussed in further detail below.

Consultation

- 1.5 The Council has prepared this SA Report Addendum for public consultation alongside the proposed Main and Additional Modifications.
- 1.6 The Council invites consultation responses on any aspect on the content and processes set out in this SA/HRA report. The consultation runs from 18 November 2016 to 13 January 2017.
- 1.7 Responses should be sent -

2 This SA/HRA Report Addendum

- 2.1 The Local Plan is being developed alongside an iterative process of Sustainability Appraisal (SA) and Habitats Regulations Assessment (HRA). SA is used to ensure that the significant social, economic and environmental effects of the emerging Local Plans are systematically identified, considered and reported on. It is a requirement that SA is undertaken in line with the procedures set out in the Environmental Assessment of Plans and Programmes Regulations (the 'SEA Regulations') 2004. HRA considers the effects of the Local Plan on protected European habitats or species, in line with the Conservation of Habitats and Species Regulations (2010).
- 2.2 This is an Addendum to the 'Pre-submission' SA/HRA Report (2015). It should be read alongside previous SA Reports, as relevant. Reports have been published throughout the different stages of the plan making process, including initial Scoping Reports, Interim SA Reports (published at the Regulation 18 stages) and Draft Final Reports (published at the Regulation 19 stage). An HRA report was prepared at the Regulation 19 stage.
- 2.3 All reports are available to access online from the individual plan pages at: www.haringey.gov.uk/localplan

- 2.4 The aim of this Addendum is to present information on the proposed Main and Additional Modifications with a view to informing the post-examination hearing public consultation and subsequent finalisation of the Local Plans. Specifically, this report seeks to screen the modifications to consider whether any further sustainability issues or implications are likely to arise from these.
- 2.5 As an addendum this report is concerned principally with presenting an appraisal of the modifications, rather than the draft Local Plan as a whole. However, consideration is given to the cumulative effects of the modifications in terms of their overall influence across the entirety of the plan, where appropriate.

3 Appraisal Methodology

- 3.1 The scope of the Sustainability Appraisal (i.e. the sustainability issues and objectives that should be a focus of the appraisal) and methodology for carrying out the appraisal has been established through previous SA reporting on the Local Plan. Accordingly, this Addendum continues to apply the SA Framework established therein. Further details on scoping are available in previous reports and the SA Framework is re-provided in **Appendix A**.

Screening

3.2 The first step in appraisal of the proposed modifications is screening. This involves consideration of whether the modifications will substantively affect the policy approach or impact significantly on the strategic sustainability objectives.

3.3 A precautionary approach to screening is taken here. This ensures that any uncertainty as to whether a modification could lead to new or different significant social, economic or environmental effects is appropriately addressed. Modifications 'screened in' where there is such uncertainty.

3.4 The exercise is set against the following screening categories:

Screen 1 (S1) - Technical clarification (e.g. factual update, grammatical/spelling correction, updates to signposted policies or documents, such as planning consents or legislation/policy, etc.) or a contextual amendment (e.g. changes to text within introductory sections which set the context for subsequent policies).

Screen 2 (S2) - Procedural clarification/change (e.g. amended supporting text on how a policy would be implemented, where the policy wording itself is not changed by the modification).

Screen 3 (S3) - Change to policy wording that would not alter how a policy would be expected to be interpreted and/or implemented (e.g. changes to policy wording and/or the supporting text to improve legibility).

3.5 Where one of these 3 screening criteria applies, modifications have been 'screened out' from further detailed sustainability appraisal consideration. This is on the basis that the modifications are unlikely to have potential significant effects and/or are unlikely to have implications for the (baseline) appraisal of the draft plan as set out in the 'Pre-Submission' SA Report (2015).

3.6 Where a modification has not been 'screened out' then it has been subject to further sustainability appraisal having regard to the SA Framework discussed above.

3.7 Outcomes of the screening and iterative sustainability appraisal process are set out in **Appendix B**. A high level summary of findings is also set out in the next section of this report.

3.8 The appraisal below relates to the proposed Main and Additional Modifications and there is no discussion of 'reasonable alternatives' to the preferred approaches taken therein, unlike in previous reports. Where particular policy issues have been addressed through Main Modifications, it is appropriate that these are not subject to formal 'alternatives appraisal' through the SA process, given that these have been considered and established through the public examination process and are necessary to make the Plan sound.

Habitats Regulations Assessment

- 3.9 For HRA screening the modifications have been subject to an initial screening exercise according to the criteria set out in paragraph 3.4 above.
- 3.10 Where one of the 3 screening criteria applies, modifications have been screened out from further detailed HRA consideration. This is on the basis that the modifications are unlikely to have significant effects on protected sites and/or are unlikely to have implications for the (baseline) assessment of the draft plan as set out in the 'Pre-Submission' HRA report (2015).
- 3.11 Where a modification has not been 'screened out' through this initial exercise, then it has been subject to further HRA consideration. The intention here is to establish whether an additional assessment of 'likely significant effects' is needed, having regard to findings of the baseline assessment. The methodology for considering potential significant effects is set out in Section 2 of the 'Pre-Submission' HRA Report.
- 3.12 A precautionary approach to screening is taken here. This ensures that any uncertainty as to whether a modification could lead to new or different significant effects on protected sites is appropriately addressed. Modifications are 'screened in' where there is such uncertainty.
- 3.13 Outcomes of the initial screening and iterative assessment process are set out in **Appendix B**. A high level summary of findings is also set out in the next section of this report.

4 Summary

- 4.1 The following section summarises key findings of the Sustainability Appraisal and Habitats Regulations Assessment screening of the Main and Additional Modifications to Haringey's Local Plan.
- 4.2 It is important to note that neither the quantum of growth planned for the Borough over the plan period, nor the spatial distribution of this growth, has changed as a result of the Main Modifications. This SA/HRA Addendum is therefore set in the context of the same overall strategic framework (i.e. Haringey's spatial strategy) that was set out and considered at the Regulation 19 'Pre-Submission' stage. Where Modifications have been proposed for the Plan, these are principally changes to the detailed development requirements and guidelines which are considered necessary for reasons of soundness.

Sustainability Appraisal

- 4.3 The majority of modifications proposed were 'screened out' from further sustainability appraisal consideration. For the most part, this is owing to the modifications consisting of changes to policy wording, or procedural clarifications within the supporting text, which did not substantively alter the overall development principles or corresponding implementation points.

- 4.4 Where modifications were ‘screened in’ it was often the case that the likely effects were assessed as being limited or insignificant in scope and the revised policy therefore did not impact on the baseline appraisal.
- 4.5 In a few instances, the modifications helped clarify expectations on policy implementation, including through additional guidance. These changes provided for greater certainty of likely significant, positive effects that were previously identified. This is particularly for Policy AAP6 (where further guidance is provided for considering impacts on protected nature conservation sites); Policy TG3 (where proposals will be expected to demonstrate how they have explored a range of options to make the most optimal and sustainable use of the site); for town centre development in North Tottenham (where the Plan better clarifies how the Council will support a flexible approach to the delivery of floorspace requirements across the strategic sites); and on various sites in the area where further information on flood risk considerations has been included.
- 4.6 The iterative appraisal process has demonstrated that the modifications do not significantly impact on the overall appraisal of the Plan, or trigger the need for new mitigation measures to manage effects. Furthermore, the modifications are not expected to result in any significant negative social, environmental or economic effects.

Habitats Regulations Assessment

- 4.7 A screening assessment on the ‘Pre-Submission’ HRA Report was undertaken for the Tottenham AAP document. This concluded that the Plan would not result in likely significant effects on European sites, either alone and in combination with other projects or plans.
- 4.8 The ‘Pre-Submission’ HRA Report identified only a limited number of policies (including site allocation policies in North Tottenham and Tottenham Hale) that had the potential to result in impact pathways that link to the Lee Valley SPA and Ramsar site. The Report concluded that the identified impact pathways could be screened out.
- 4.9 As this Addendum has previously set out, the proposed modifications do not change the overall scale or location of development expected to be delivered in the Tottenham area, or Haringey, over the plan period. Furthermore, the site development principles for the site allocations remain intact. The bulk of modifications are principally changes to the detailed site requirements and development guidelines, most of which have been ‘screened out’ from further HRA consideration, using the methodology set out in paragraph 3.4. The remaining modifications have been considered against the findings of the baseline assessment. It is considered that these findings remain applicable to the policies as modified.

- 4.10 It is important to note that Policy AAP6.I provides further requirements on nature conservation for development proposals within the Tottenham area. These requirements are intended to be considered alongside adopted Borough-wide policy SP13 and emerging policy DM19. Policy AAP6.I was included in the Plan having been informed by recommendations of the HRA Report (2015).
- 4.11 There is a proposed modification for additional supporting text which provides guidance on implementation of Policy AAP6.I. The modification has been included on the recommendation of Natural England through the public examination process. Natural England has stated its in-principle support for the Policy AAP6.I, and considers the supporting text will provide for more effective implementation. This will ensure appropriate consideration and protection of European sites
- 4.12 In light of all of the above points, it is concluded that the proposed modifications will not result in any likely significant effects on European sites, either alone or in combination with other projects or plans.

7.10 In accordance with Policy SP8, a net increase of 23,800m² of B Class employment floorspace is required across the borough up to 2026. The Tottenham area contains the majority of the borough's remaining large industrial estates and therefore has a significant role in meeting the increased floorspace requirement. The Tottenham AAP identifies a number of strategic sites where employment-led, mixed use redevelopment is promoted to secure the renewal or reconfiguration of existing floorspace. These sites are set out in the Table 12 below. An indicative employment floorspace capacity for each site is also shown; however it is recognised that these figures are indicative and are gross floorspace. The actual amount of floorspace (gross and net) will depend on the floorspace to be retained and reconfigured, the achievement of the maximum employment floorspace on existing employment sites having regard to the proposed overall mix, site layout and constraints, and viability.

7.11 In accordance with Strategic Policy SP10, the Local Plan establishes a requirement for an increase in retail provision of 23,995m² floorspace (13,800m² comparison goods and 10,195m² convenience) across the borough up to 2026. To meet this requirement, the Tottenham AAP identifies sites with potential to deliver 85,570m² of town centre uses floorspace. The vast majority of this town centre floorspace is anticipated to be within the retail Use Classes and includes the reorientation of the Retail Park in Tottenham Hale to a District Centre and the expansion of a leisure-oriented local centre in North Tottenham. It is important to note that the figures set out in Table 12 are gross and indicative, and as mentioned in relation to the Tottenham Retail Park will replace the existing big box retailing with a more fine-grained, mixed use, walk-to retail typology. This may therefore not result in a significant change in the total on-site retail floorspace.

7.12 The physical and social infrastructure required to support the development and growth planned for in Tottenham, through both the Strategic Policies DPD and the Tottenham AAP, is set out in the Council's Infrastructure Delivery Plan (IDP). The IDP is intended to be a live document and will be updated regularly to take into account the monitoring of infrastructure delivery and changes to the service plans and funding commitments of the delivery bodies. For the latest position on the infrastructure requirements, and delivery against these, please visit the Council's website <http://www.haringey.gov.uk/localplan>
